LAB 2

JIRA AGILE PROJECT MANAGEMENT

Community Solar Credit Allocation Manager

Name: PRITHVI RAJ PANDEY

SRN: PES1UG25CS833

Section: C

Jira Board: CSCM

PROJECT & JIRA EVIDENCE

Project: Community Solar Credit Allocation Manager

Jira Board: CSCM

Evidence: Epics, User Stories, Priorities, Story Points, Sprint Boards, Burndown Charts, Final Completion Status and Reflection

Lab 2 Submission • Agile Backlog Creation & Sprint Simulation

Project & Sprint Evidence Summary

This report compiles the Jira evidence supplied for Lab 2. The evidence covers the project backlog, SCRUM Sprint 1, SCRUM Sprint 2 and SCRUM Sprint 3, the movement of work items through Jira workflow columns, and the final completed-work view.

Observed sprint allocation

- Sprint 1: SCRUM-8 to SCRUM-10 — Solar generation and credit monitoring.
- Sprint 2: SCRUM-11 to SCRUM-13 — Solar credit transfer.
- Sprint 3: SCRUM-14 to SCRUM-16 — Billing and reporting.

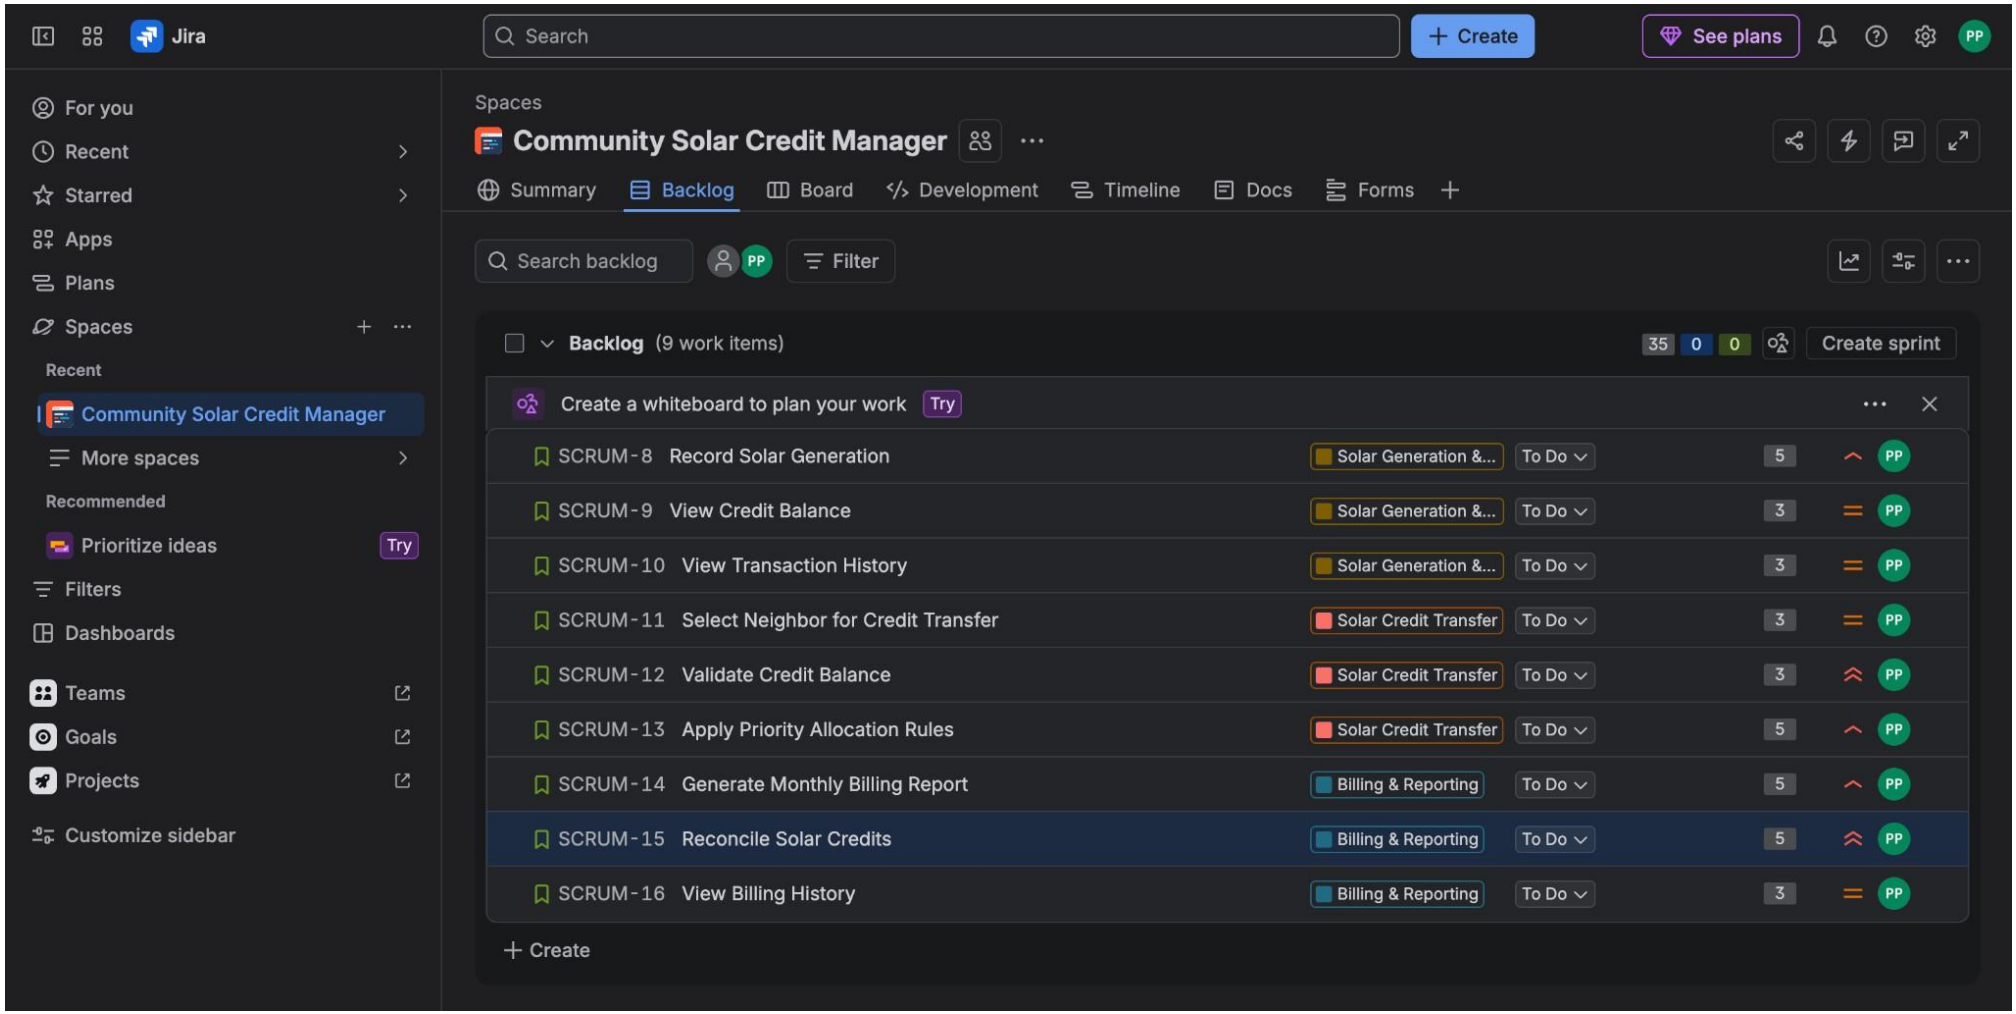

Overall evidence

The supplied final Jira views show the sprint work progressing through To Do, In Progress and In Review into Done, and the final “Reported by me” view shows the listed SCRUM work items with Done status.

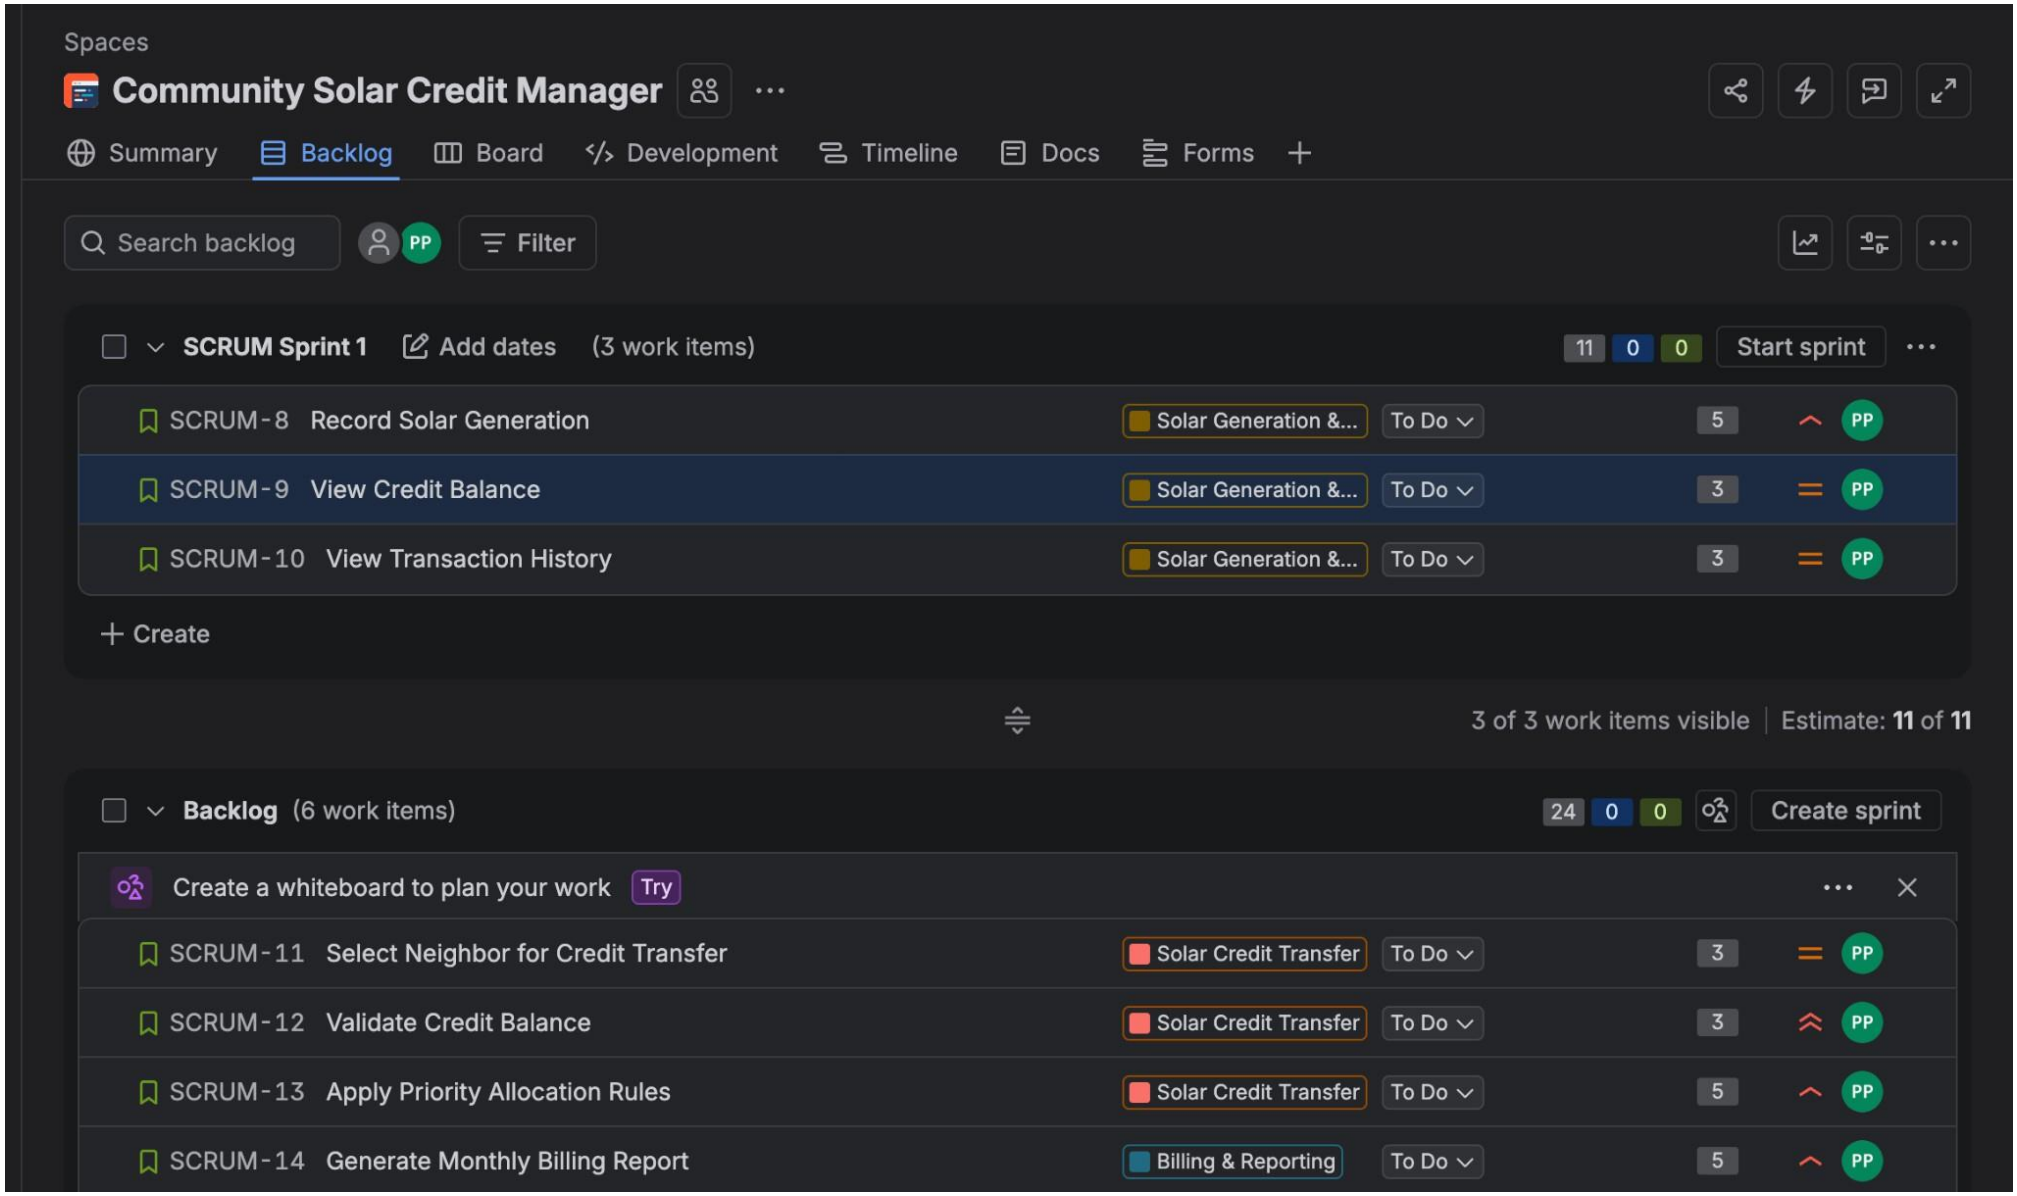

Lab 2 Deliverables Covered

- Epics and User Stories
- Priorities and Fibonacci Story Points
- Sprint board evidence and workflow progression
- Burndown Charts for Sprint 1, Sprint 2 and Sprint 3
- Final Jira completion status and Reports Dashboard
- Reflection Questions & Answers

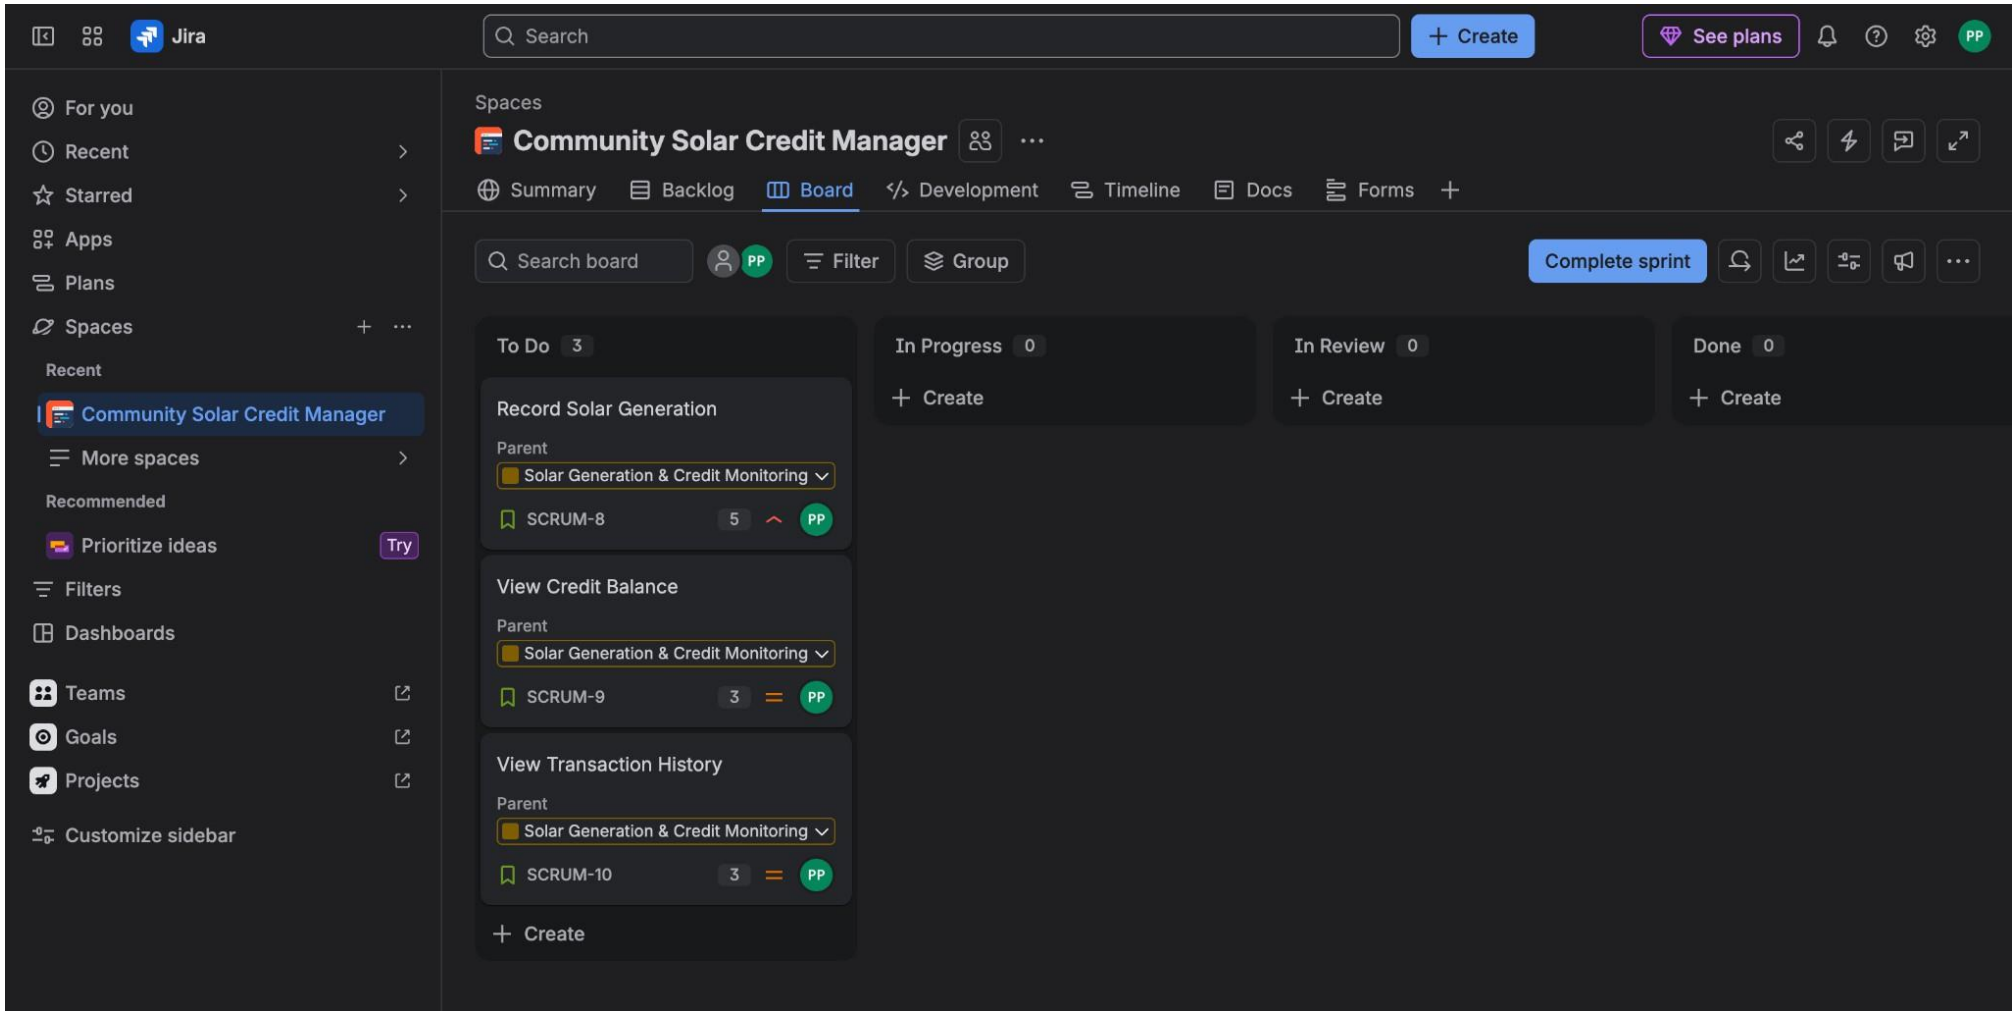

Jira Evidence – Community Solar Backlog Overview

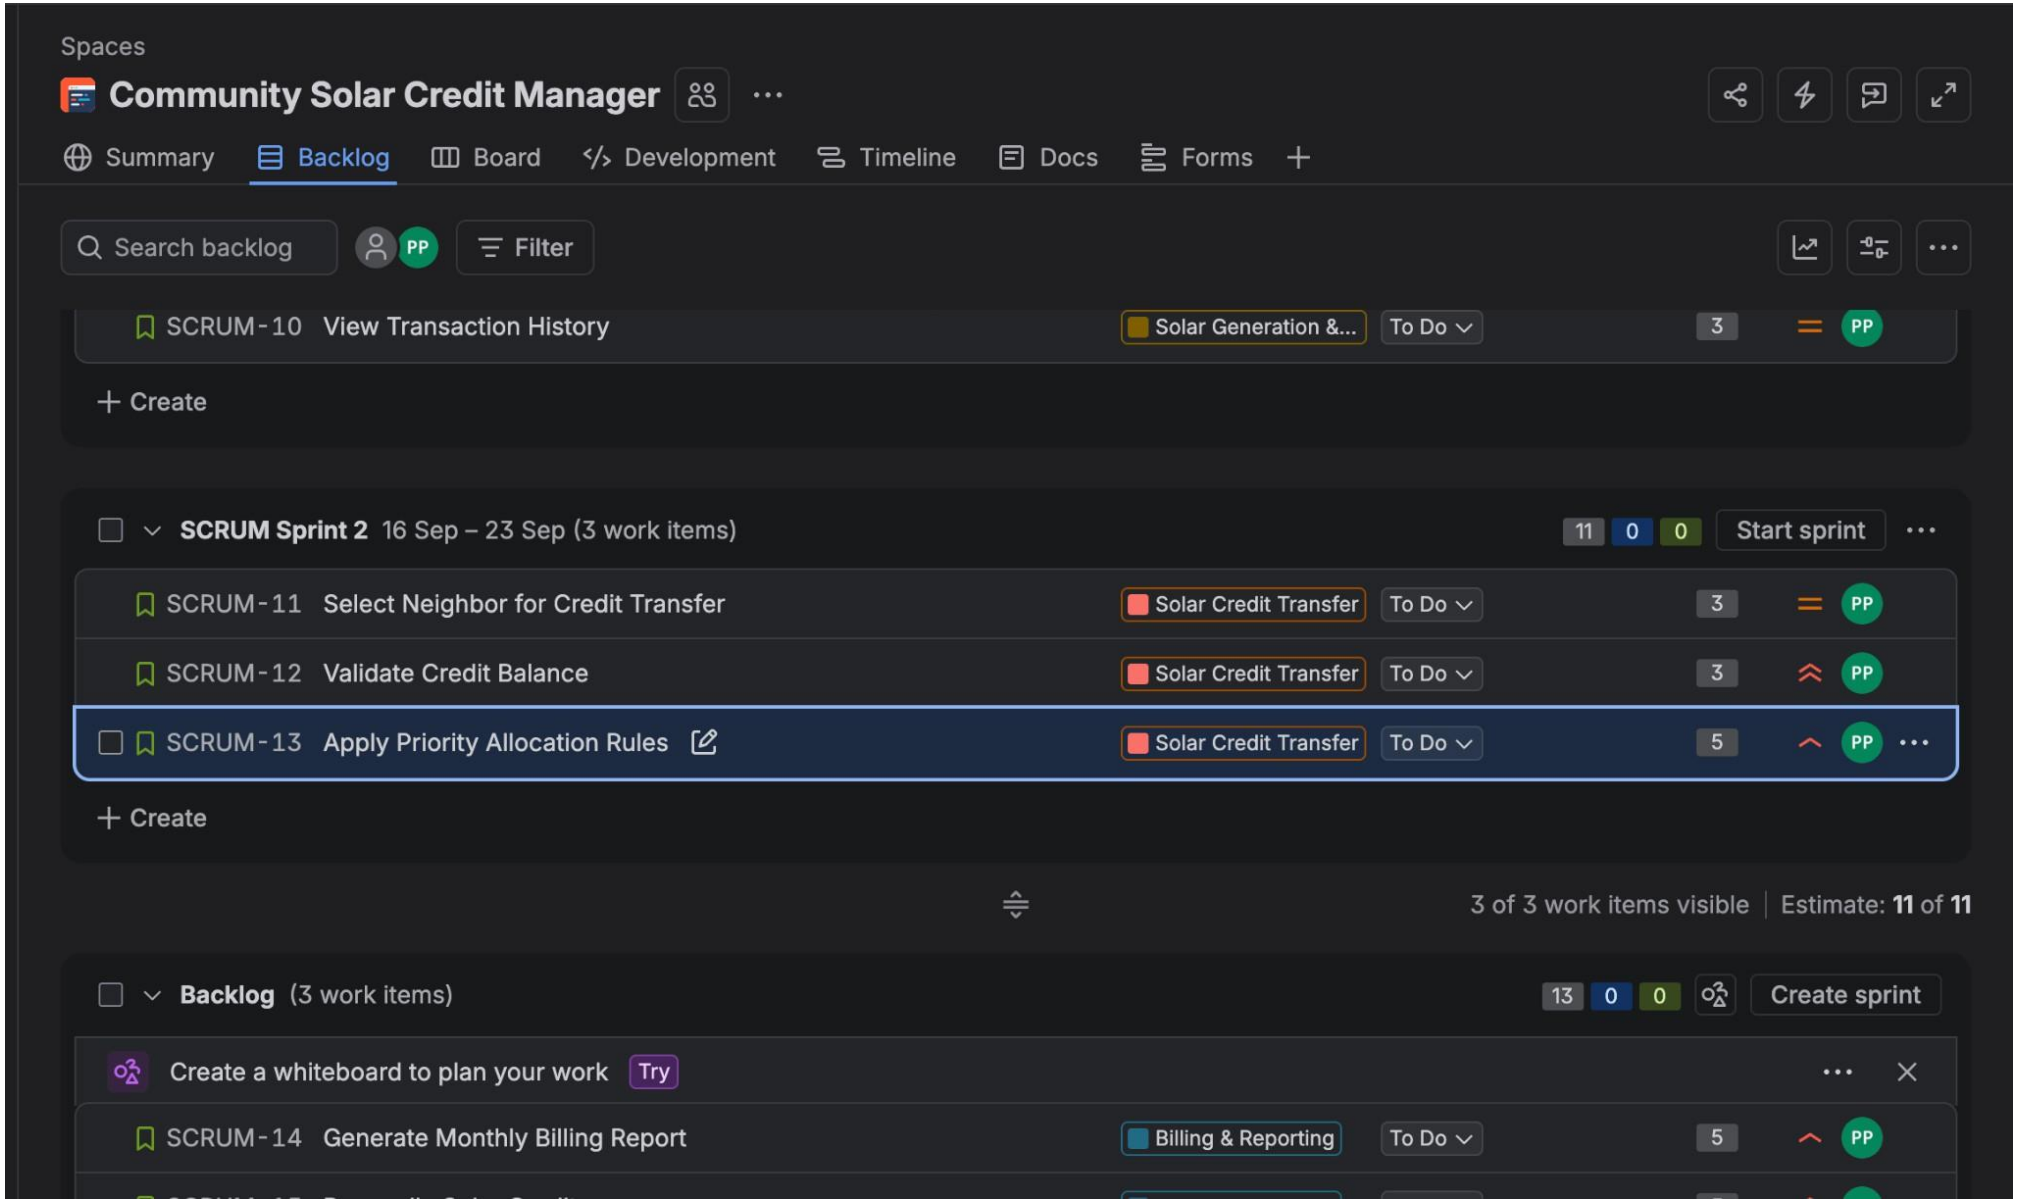

Jira Evidence – Sprint 1 Backlog and Story Allocation

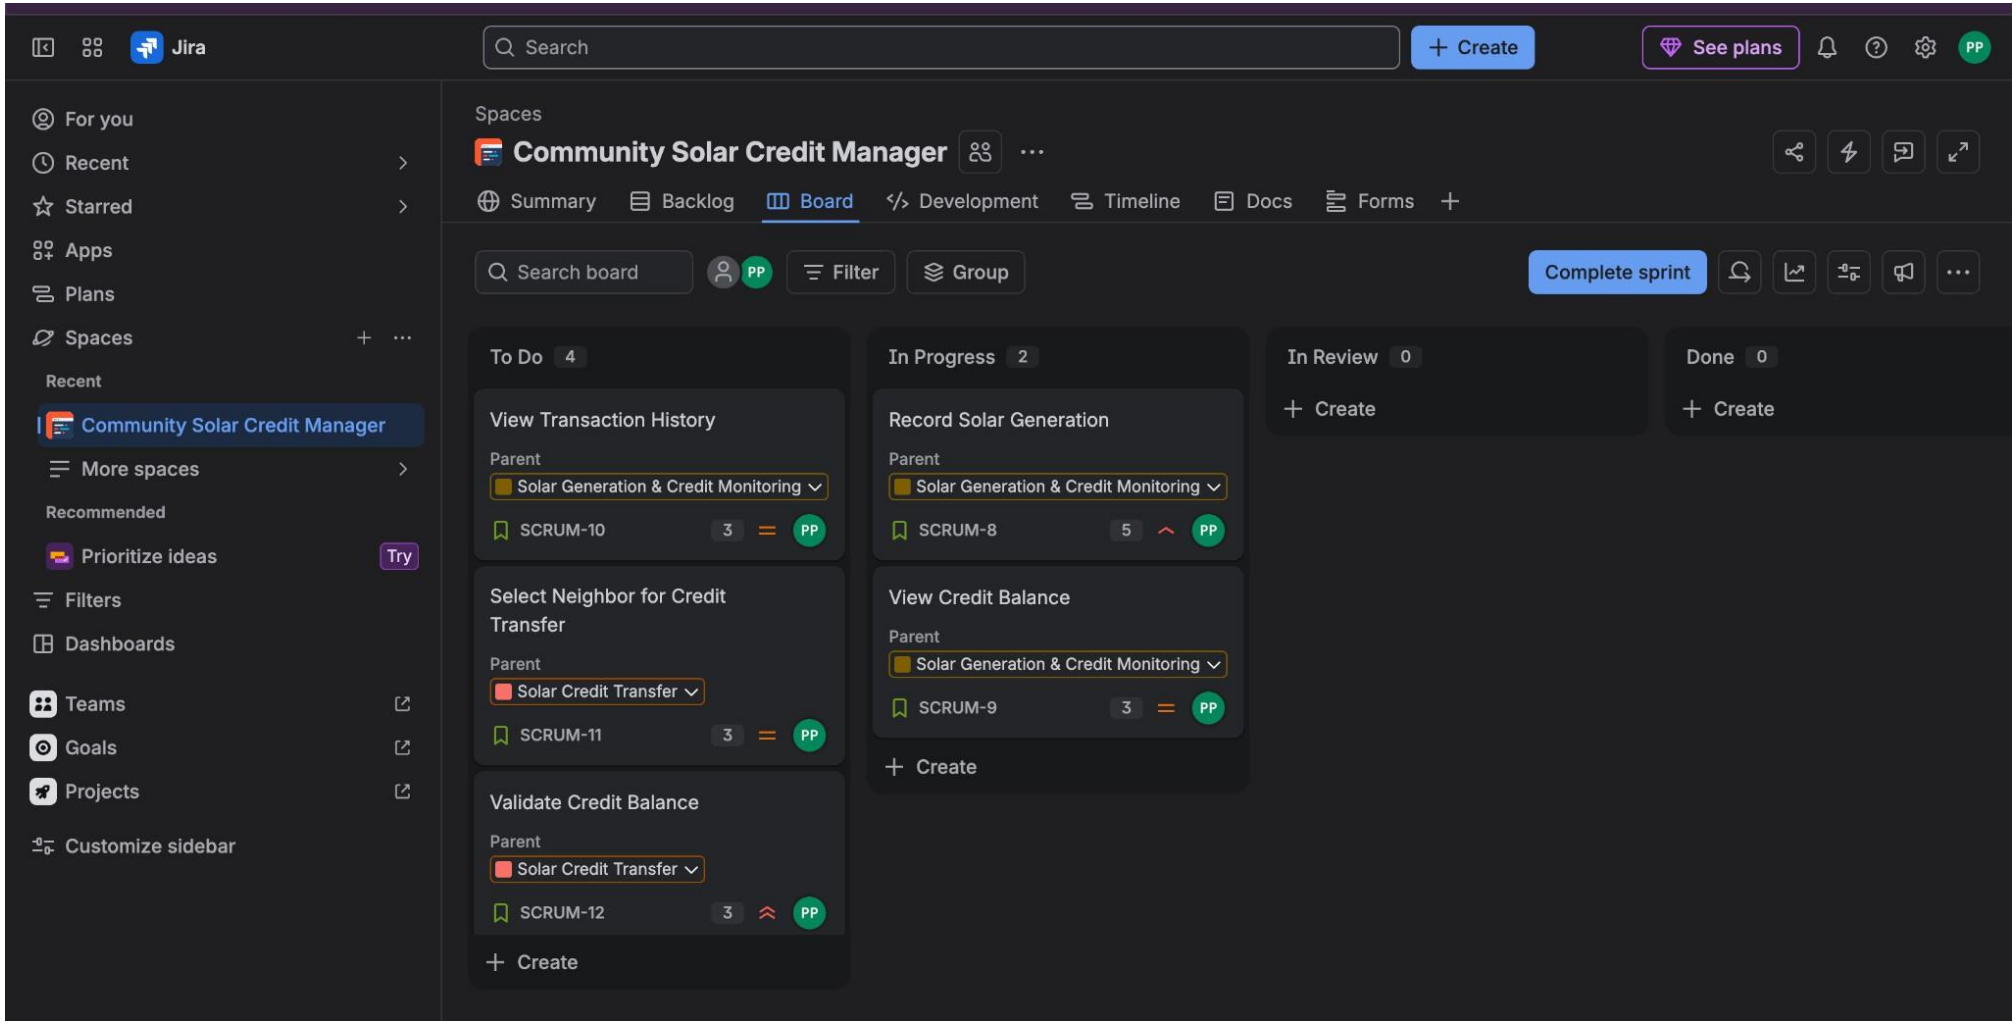

Jira Evidence – Sprint 1 Board: Completed Stories

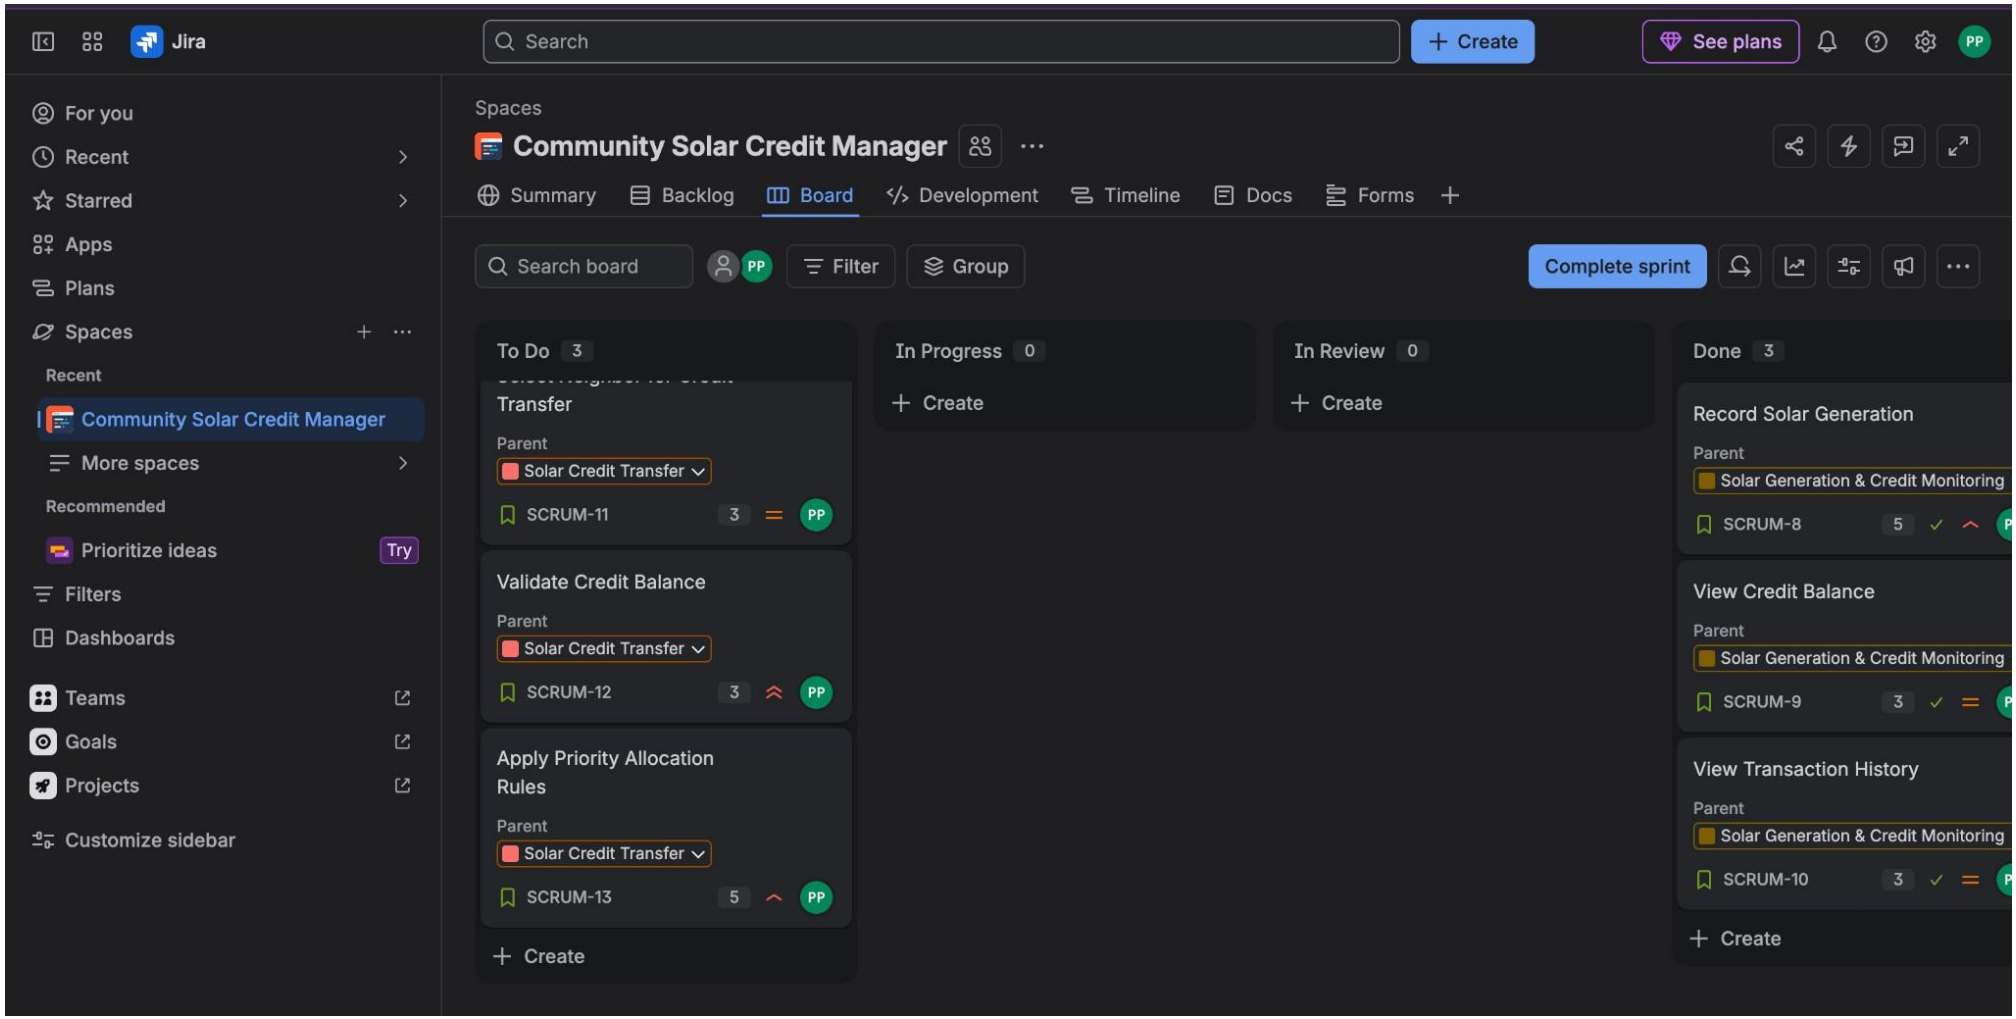

Jira Evidence 10 – Sprint 2 Backlog and Story Allocation

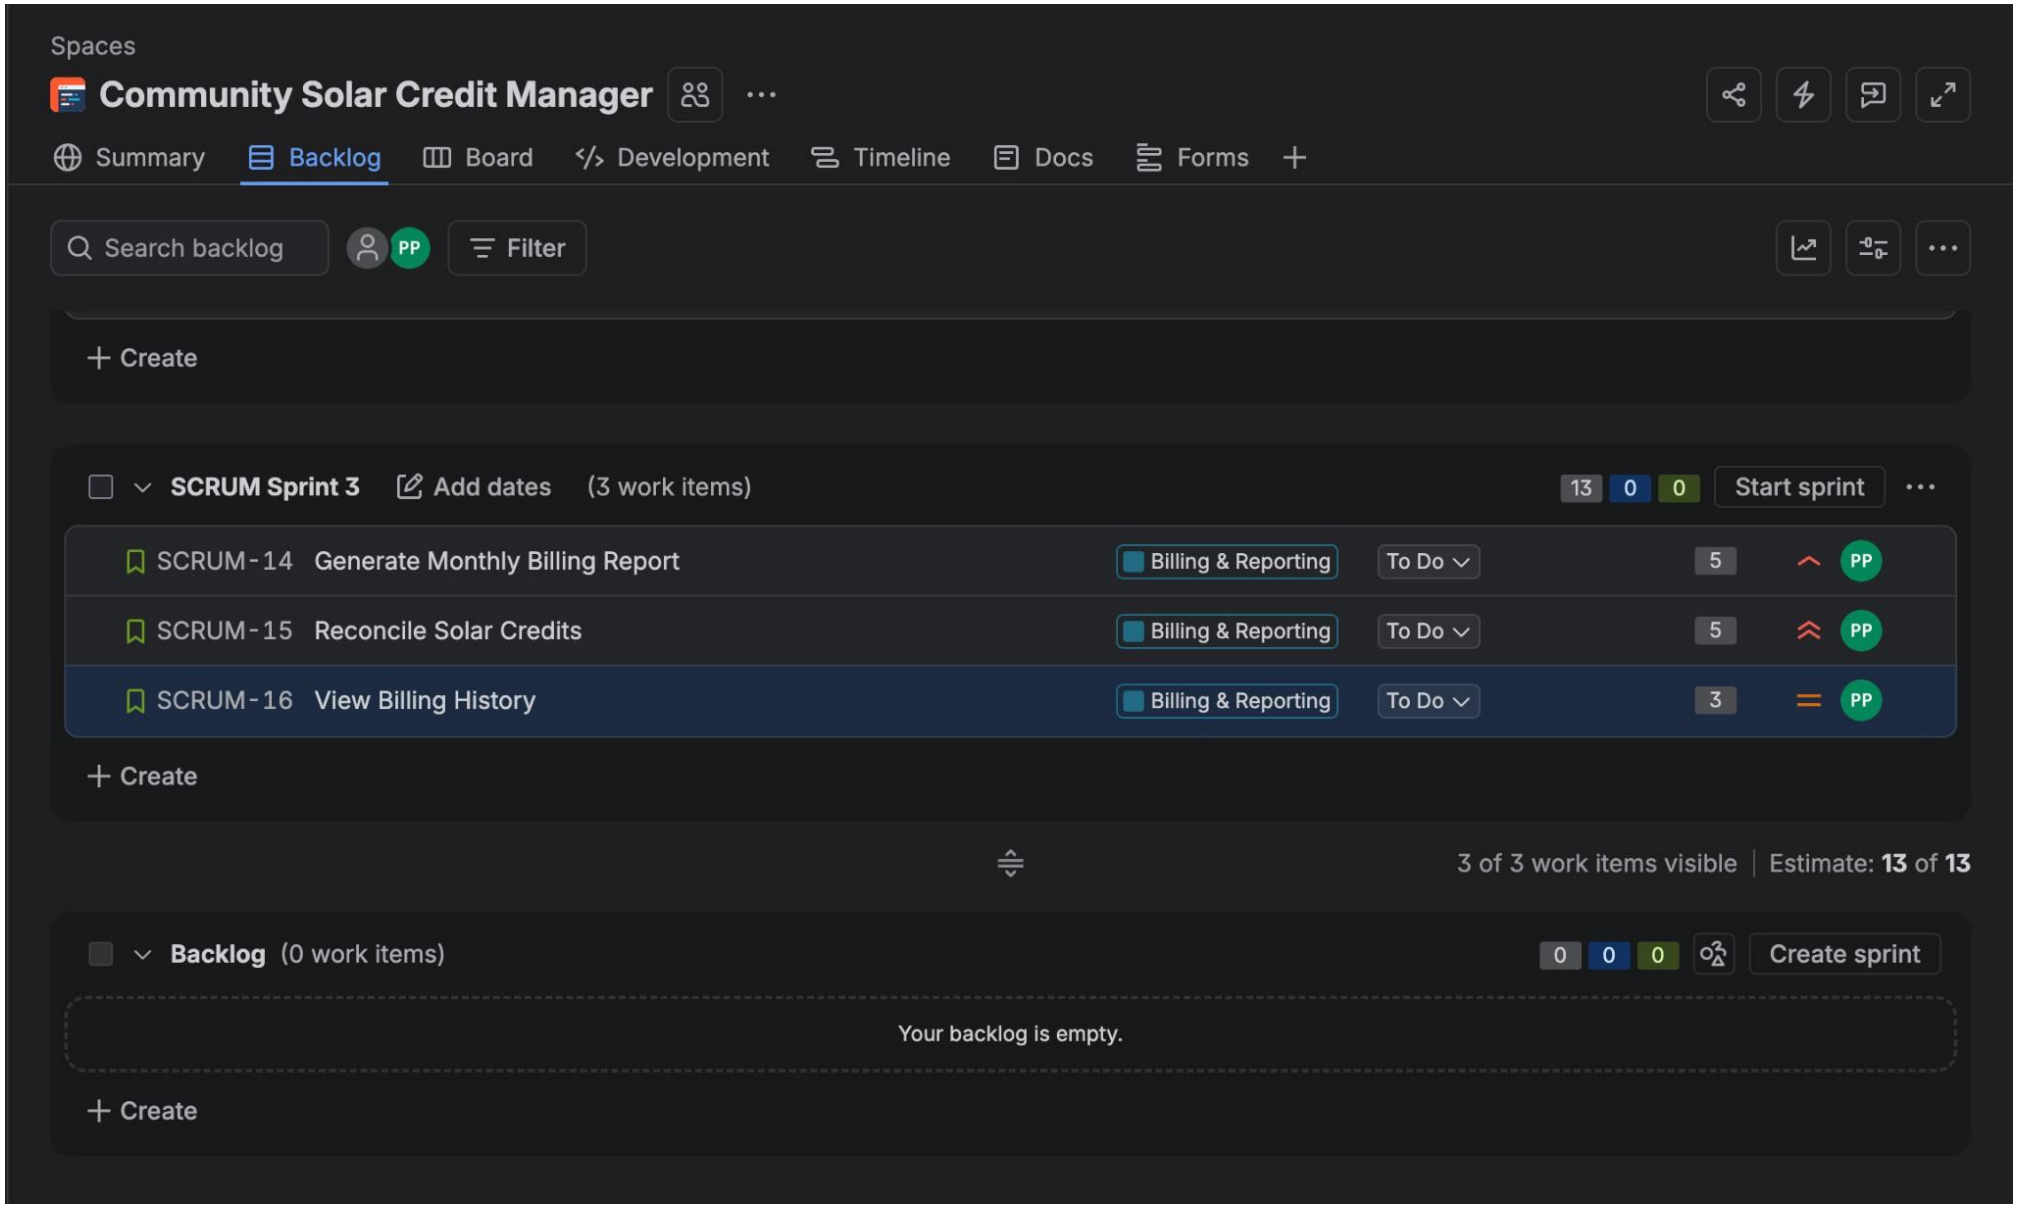

Jira Evidence – Sprint 2 Board: Work in Progress

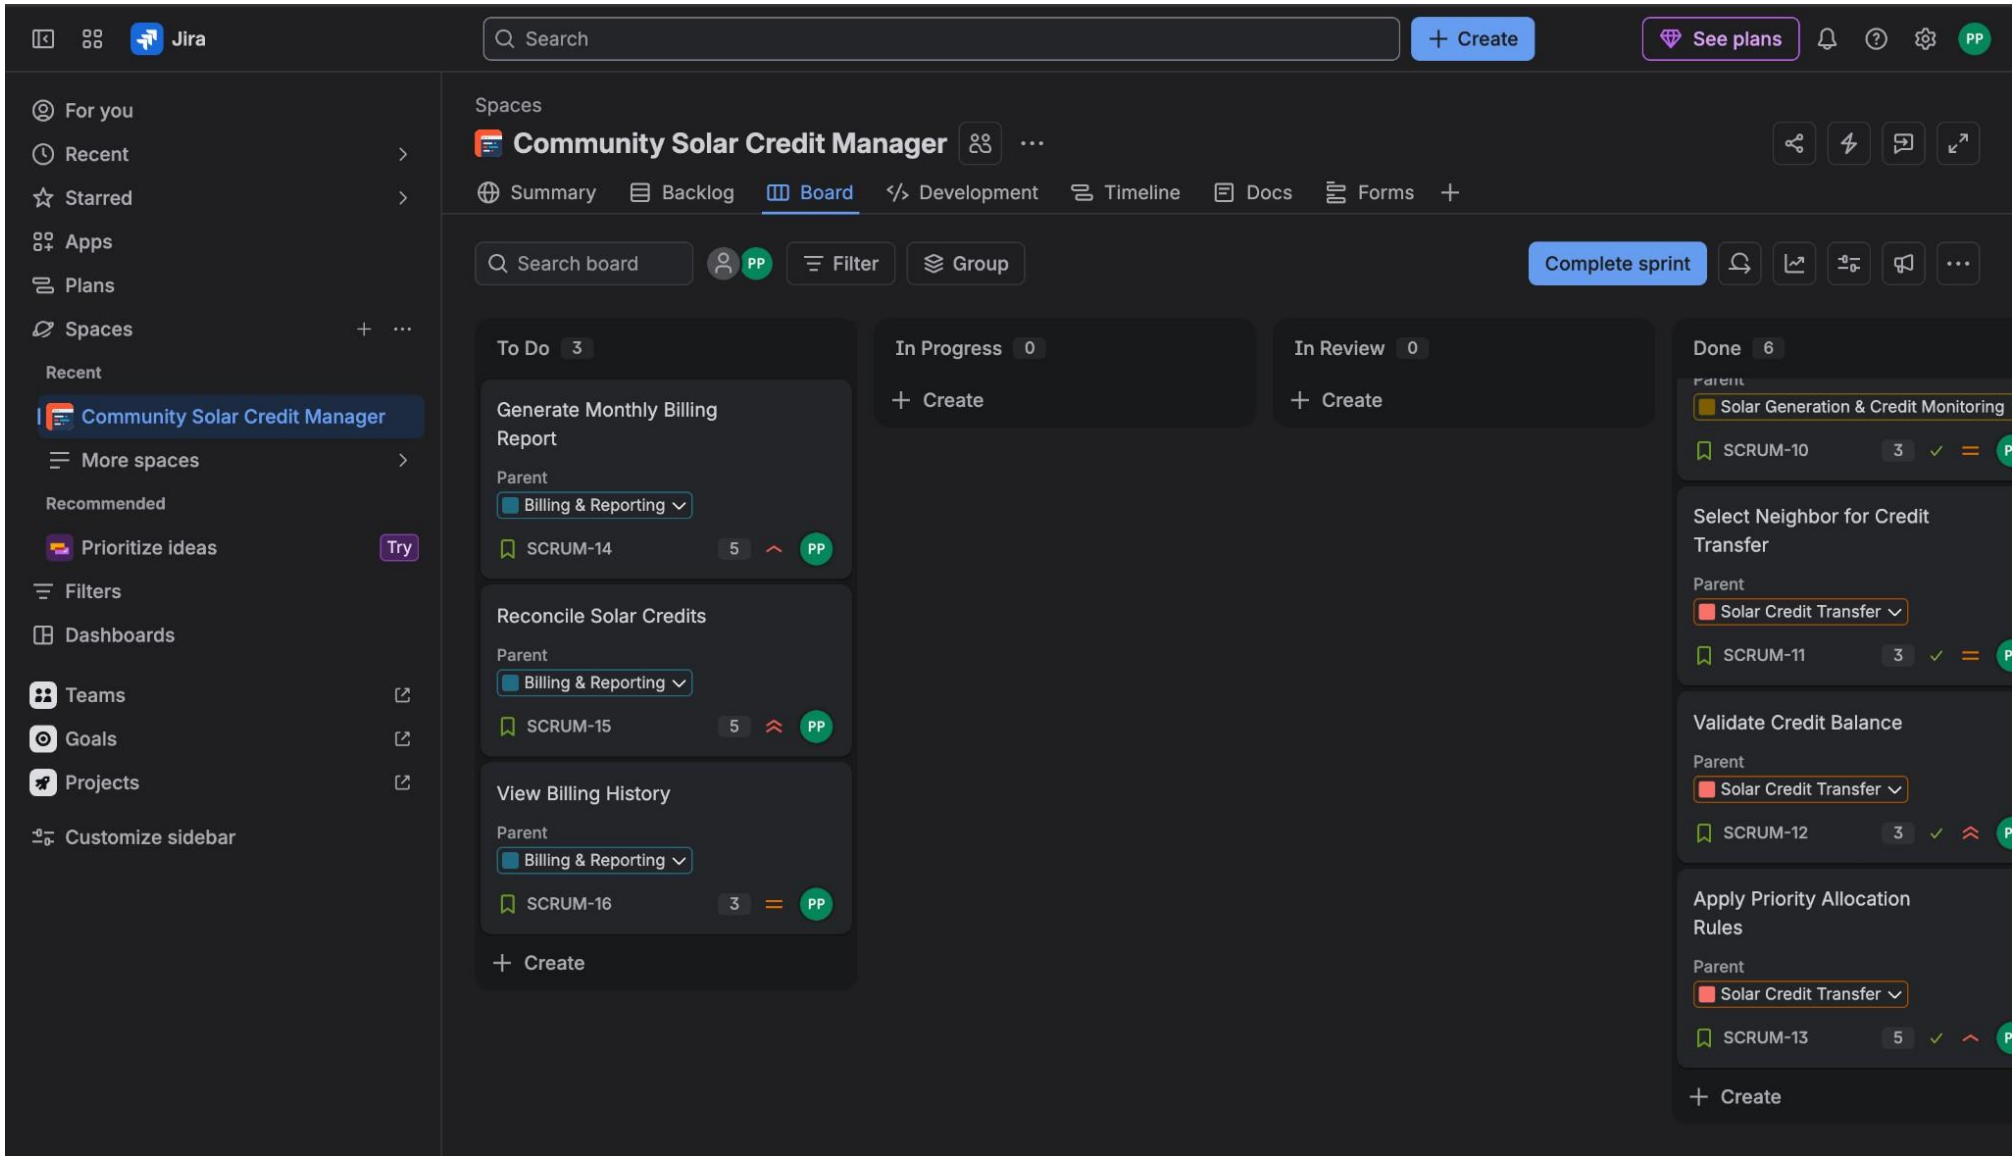

Jira Evidence – Sprint 2 Board: Progress Through Workflow

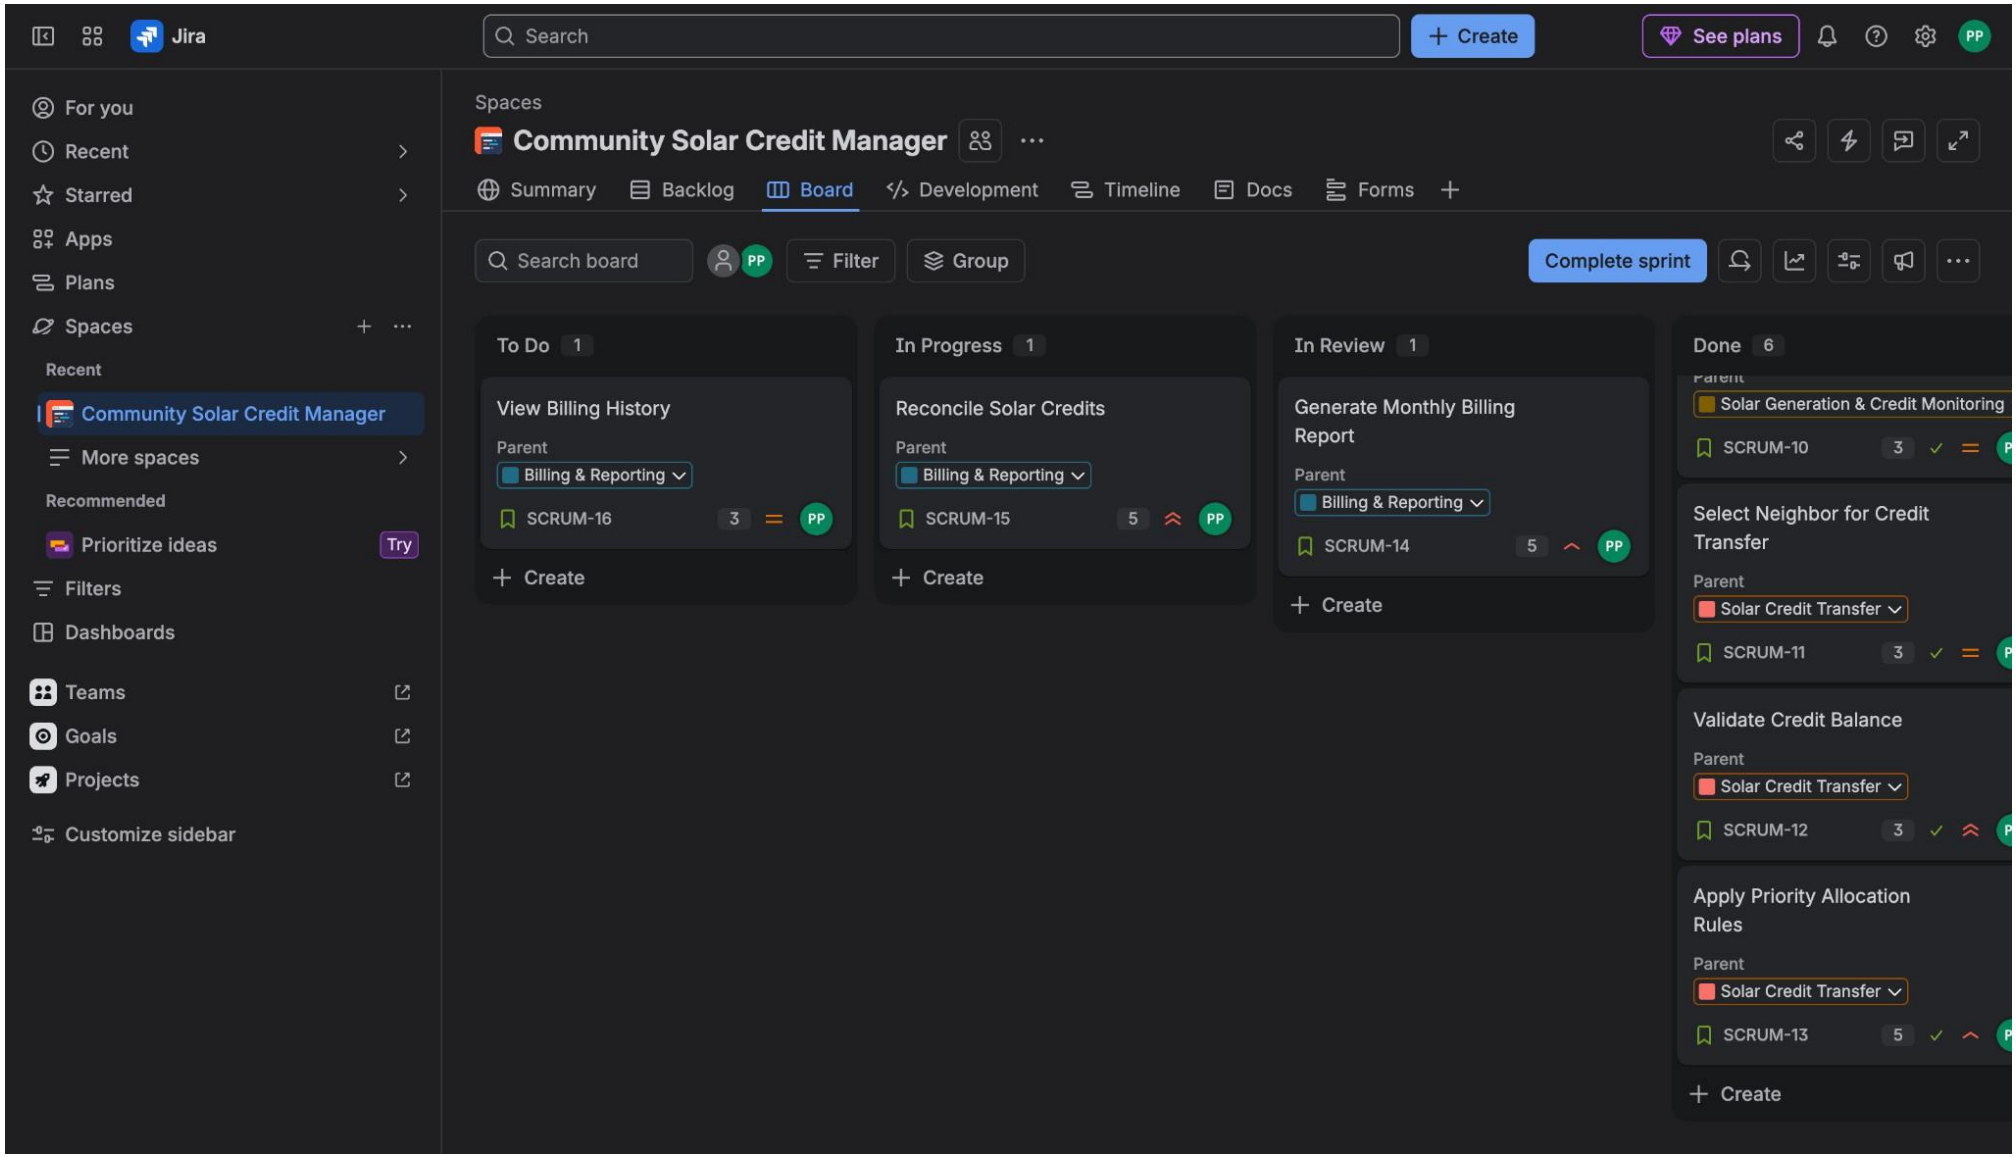

Jira Evidence – Sprint 3 Backlog and Story Allocation

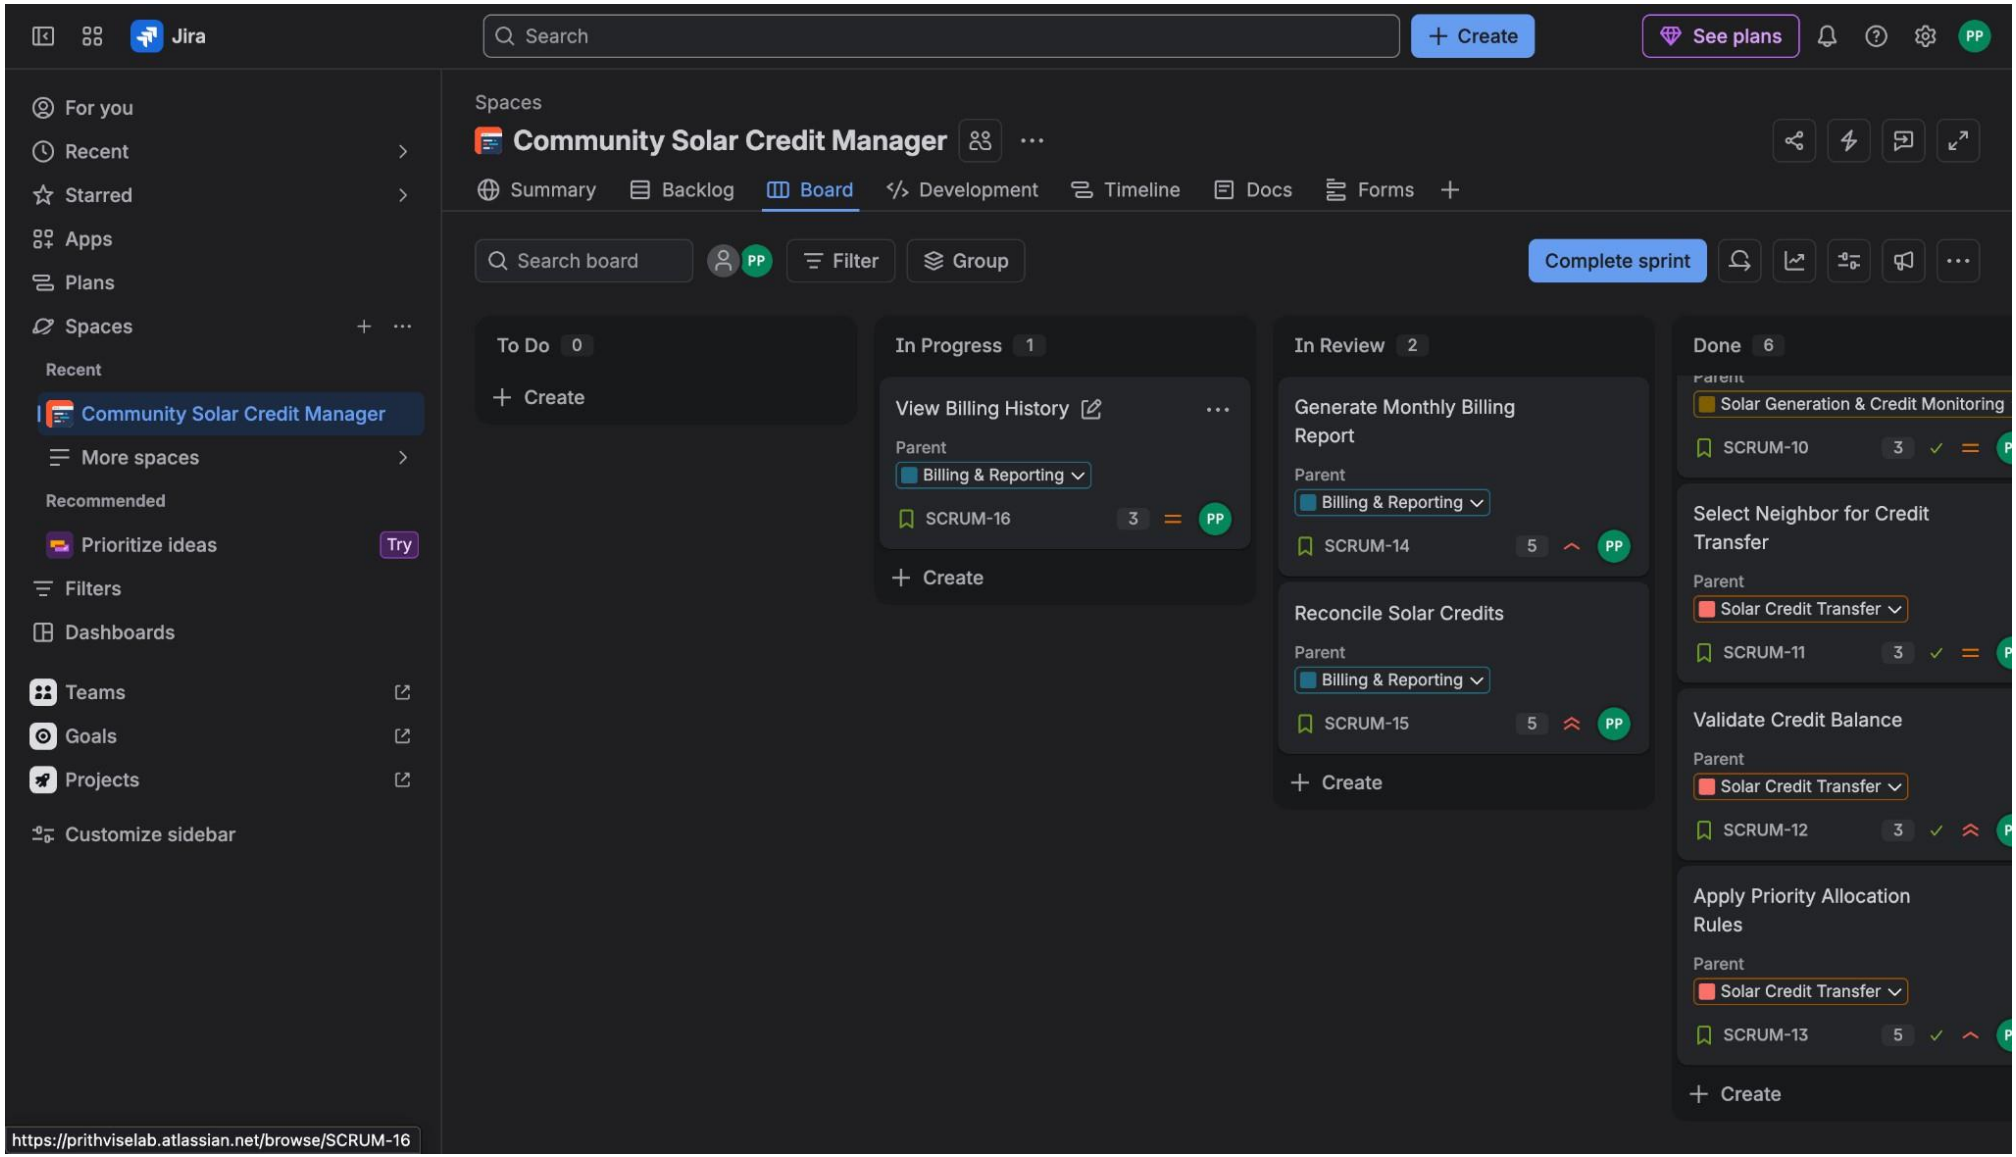

Jira Evidence – Sprint 3 Board: Initial Work Distribution

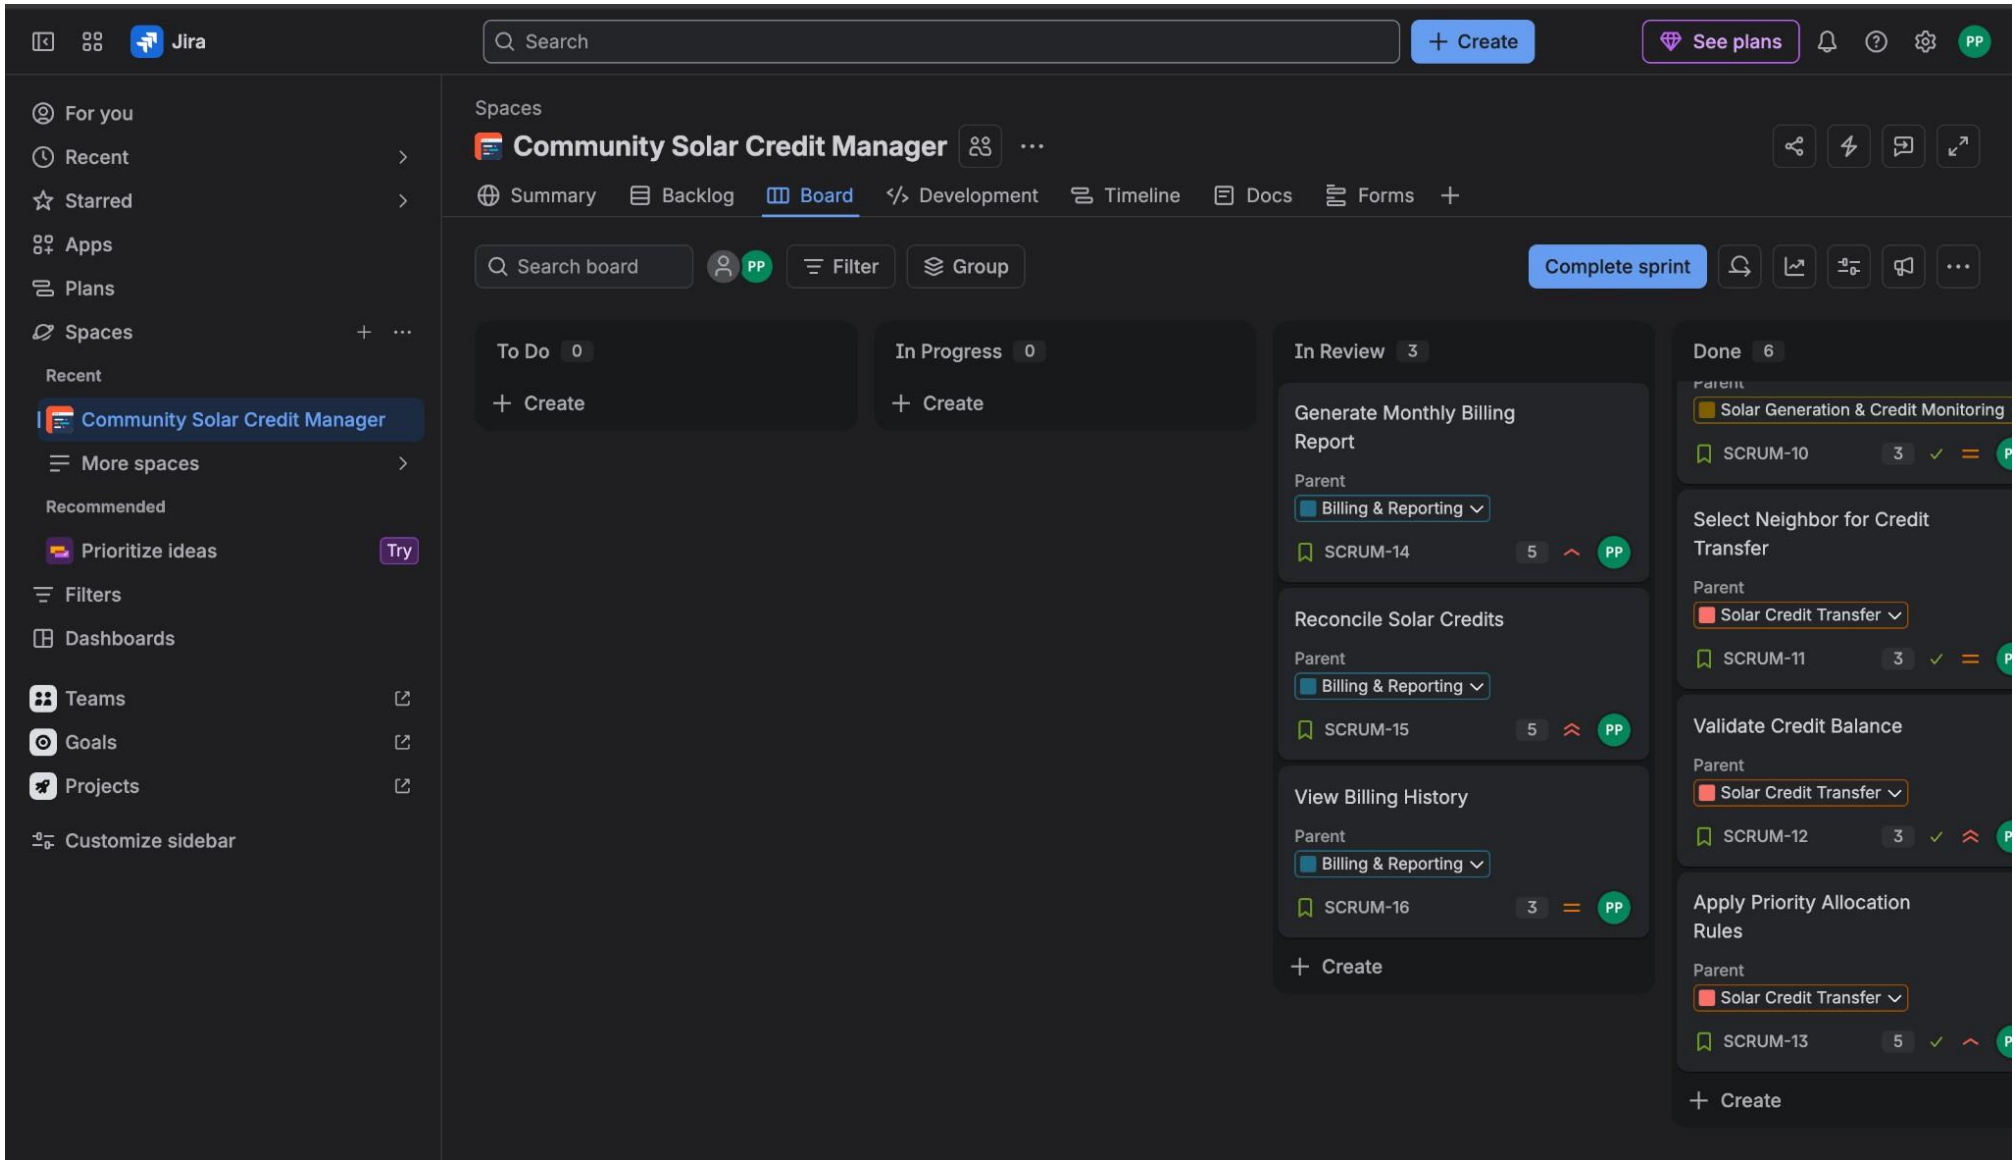

Jira Evidence – Sprint 3 Board: Work in Progress

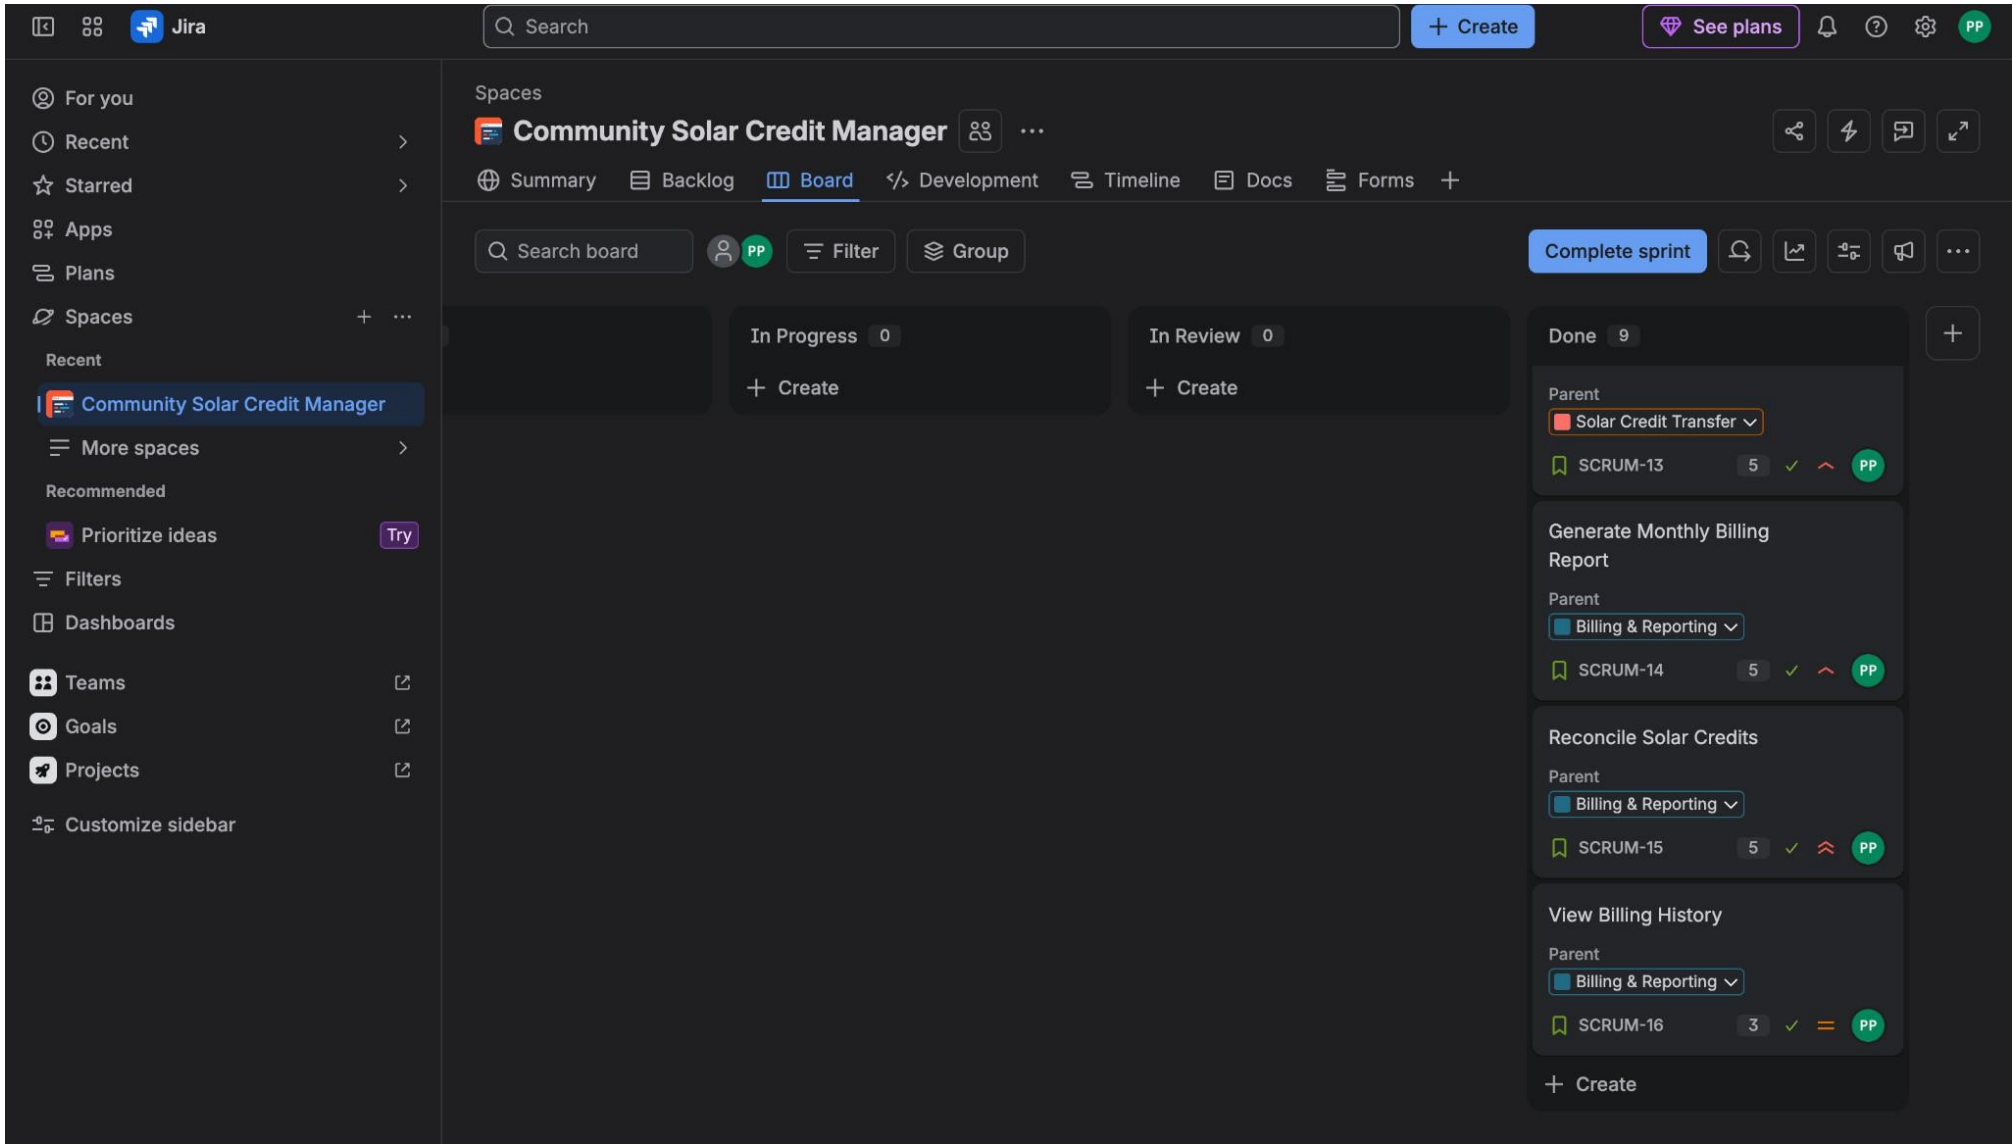

Jira Evidence – Sprint 3 Board: Work Through Review

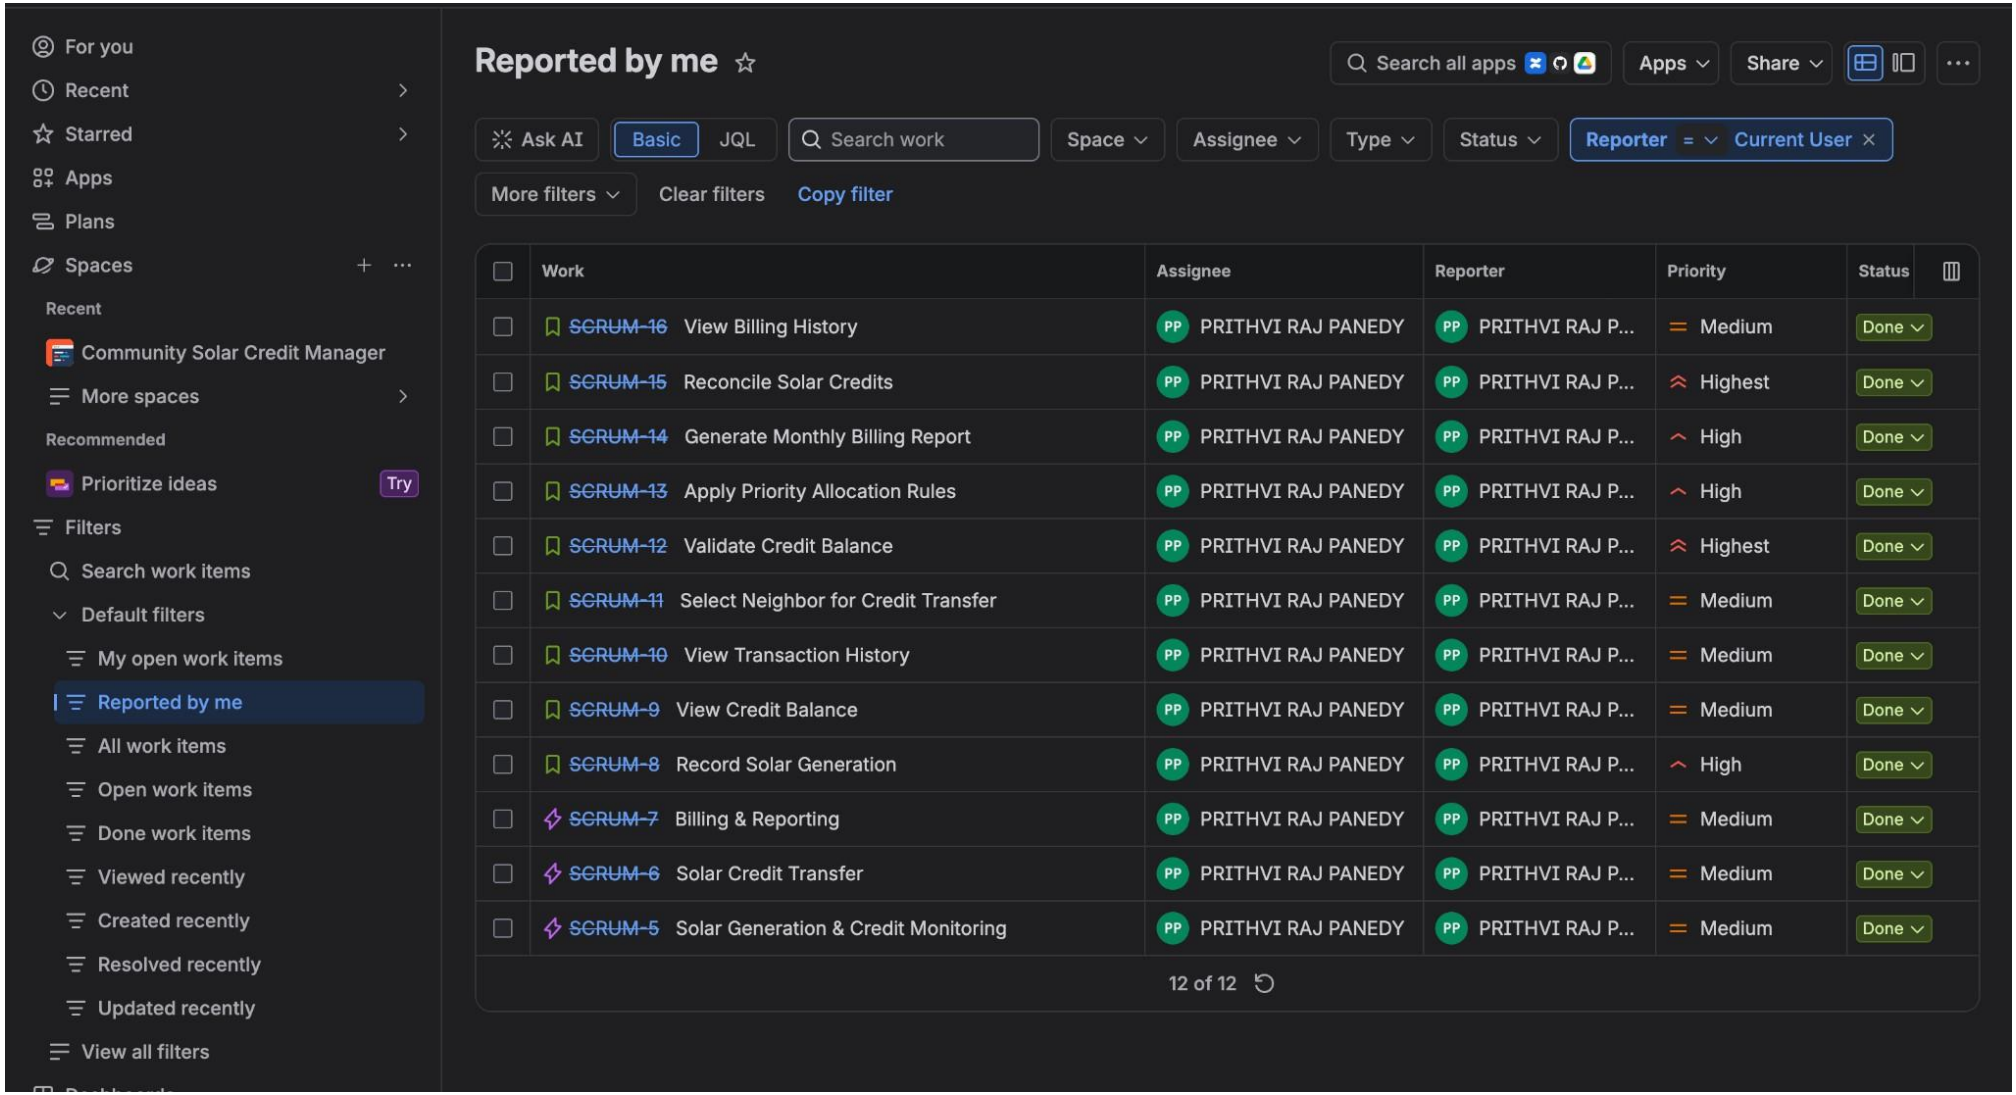

Jira Evidence – Sprint 3 Board: Final Review State

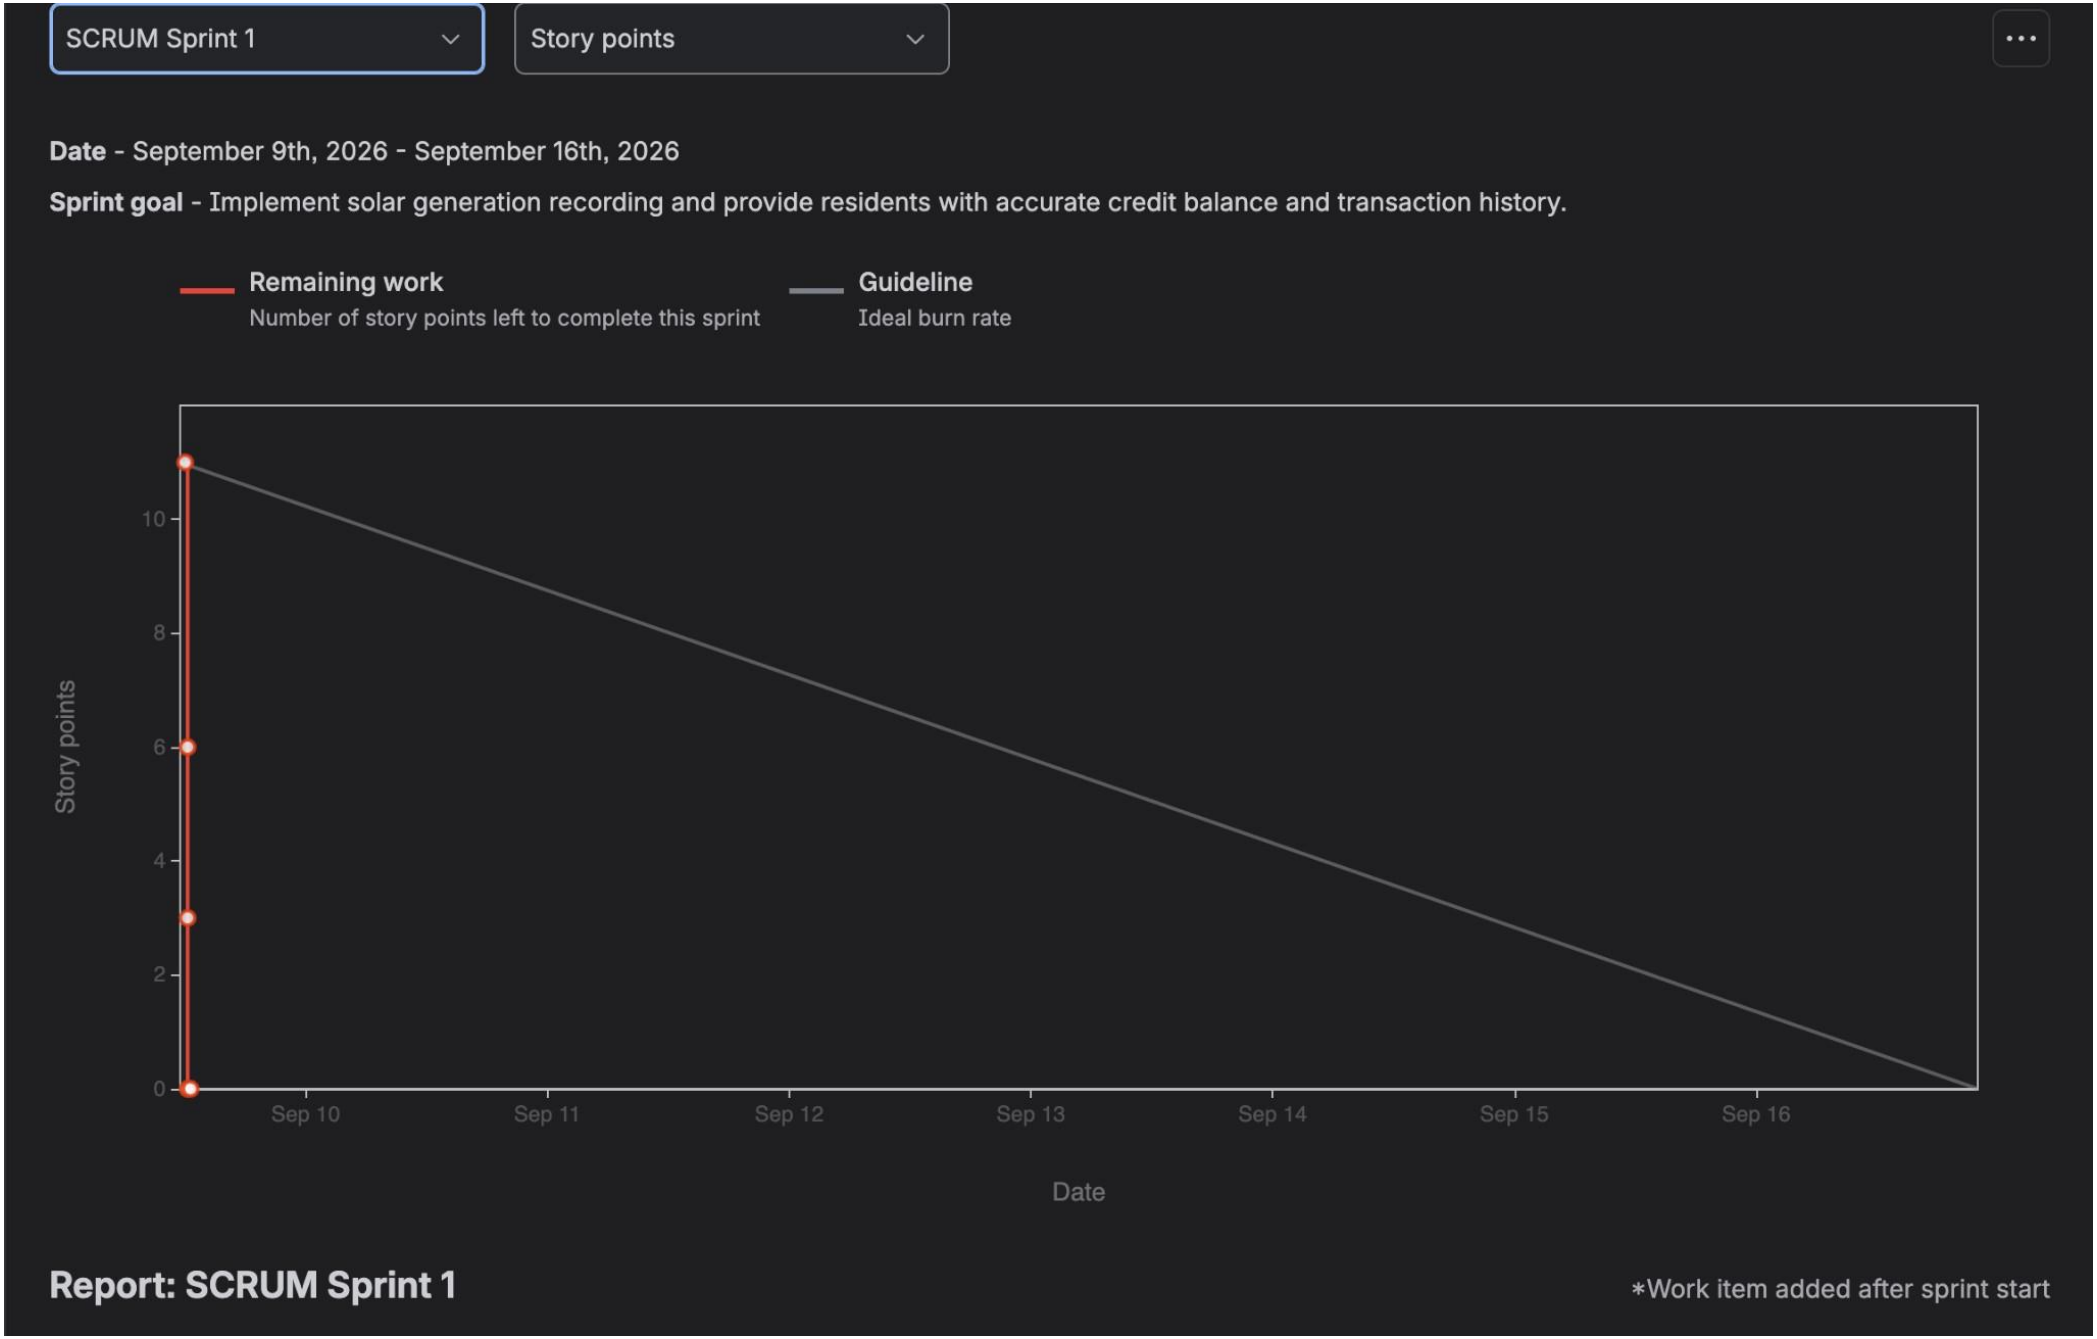

Jira Evidence – Sprint 3 Board: Completed Work

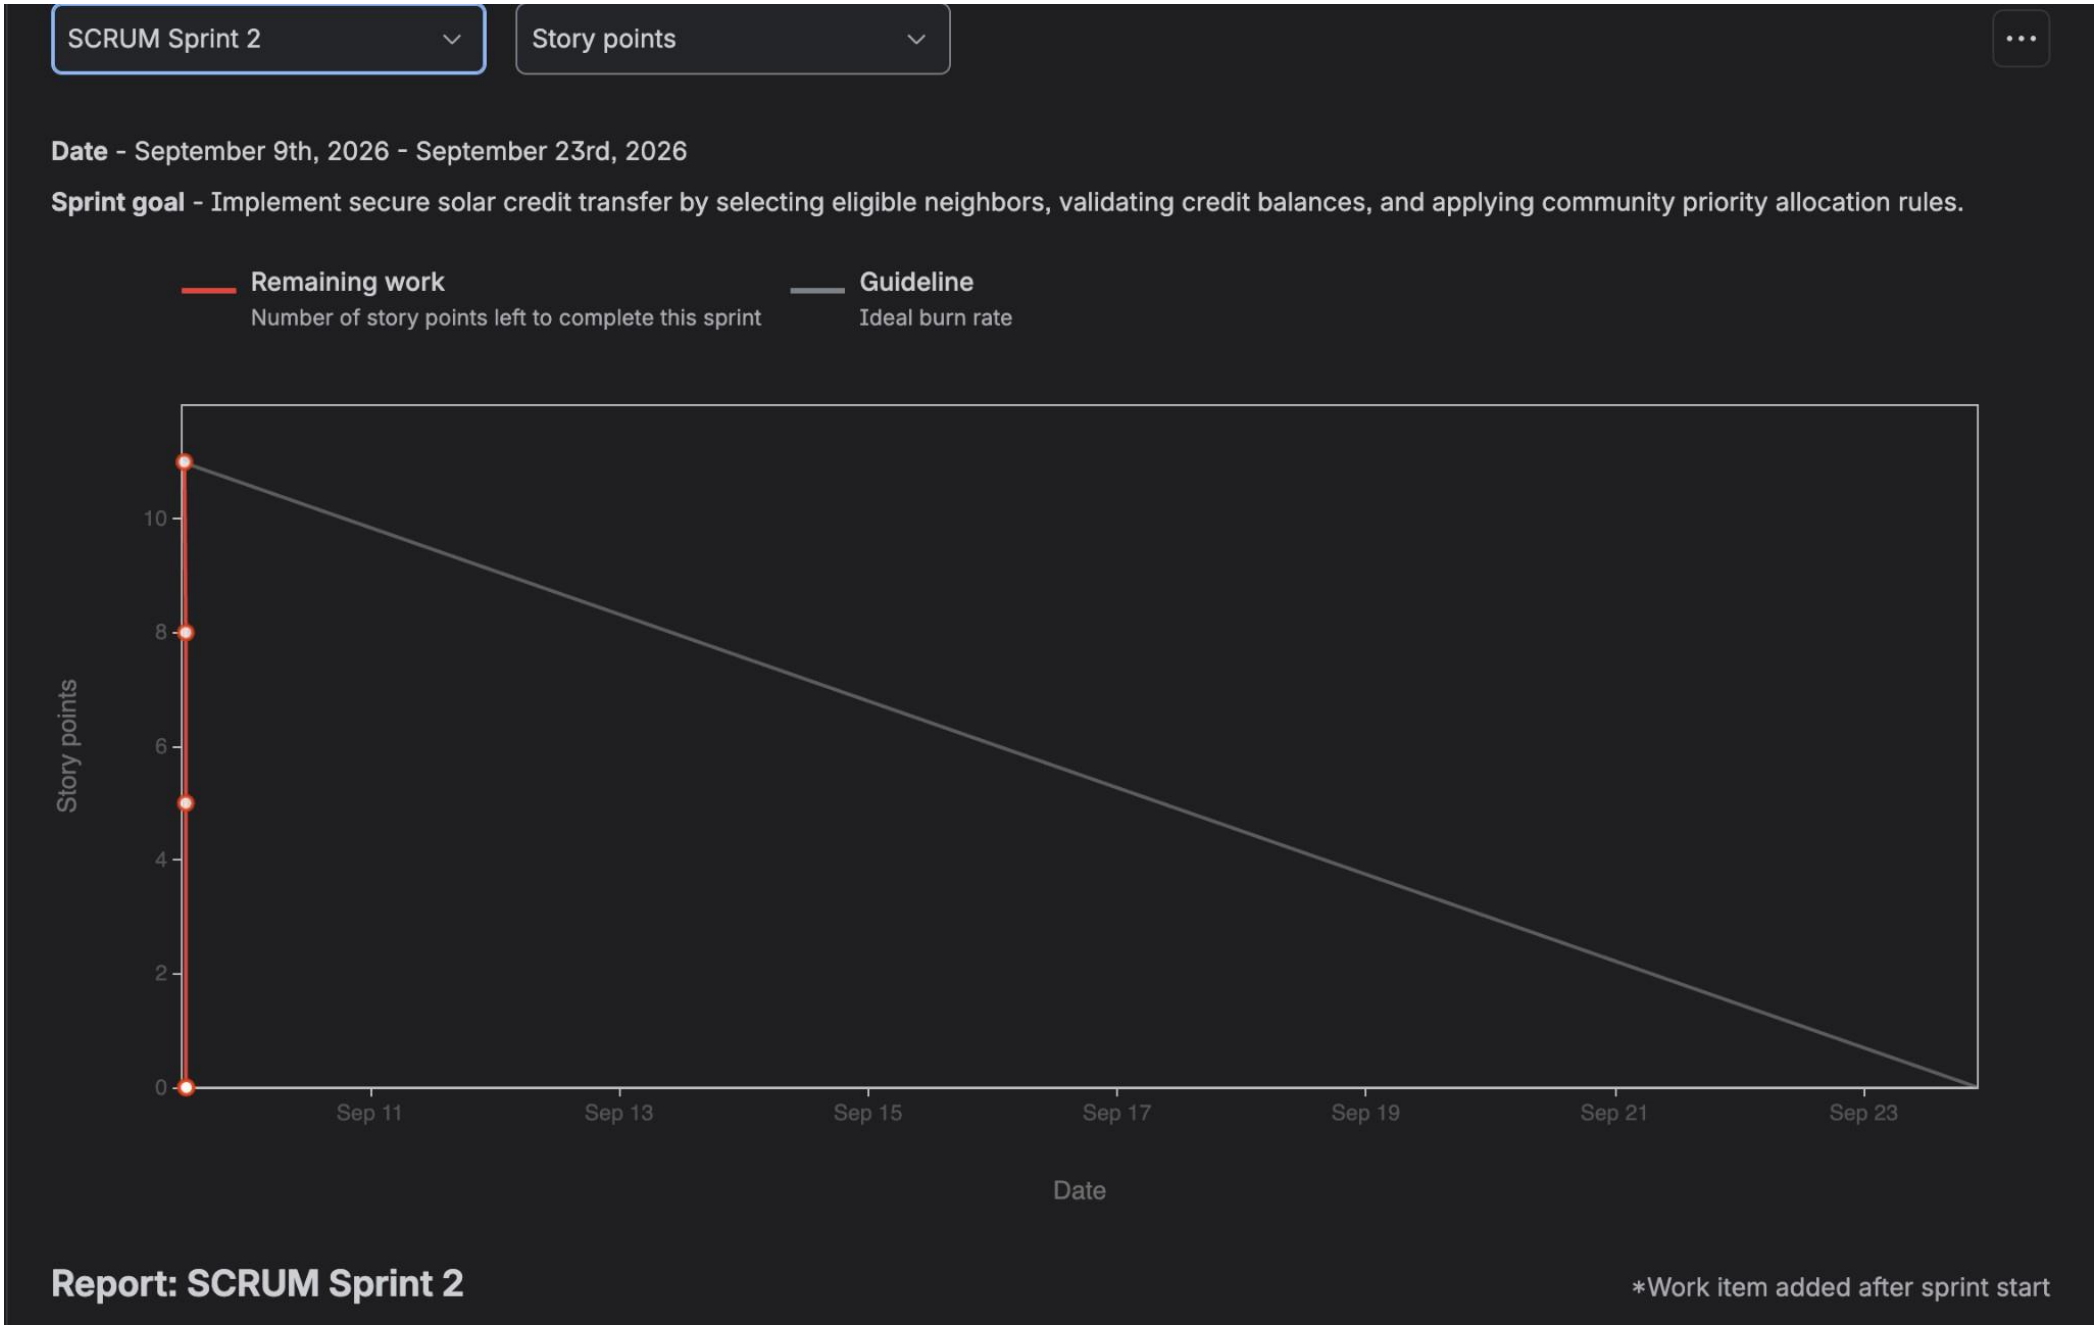

Jira Evidence – Final Jira Completion Status

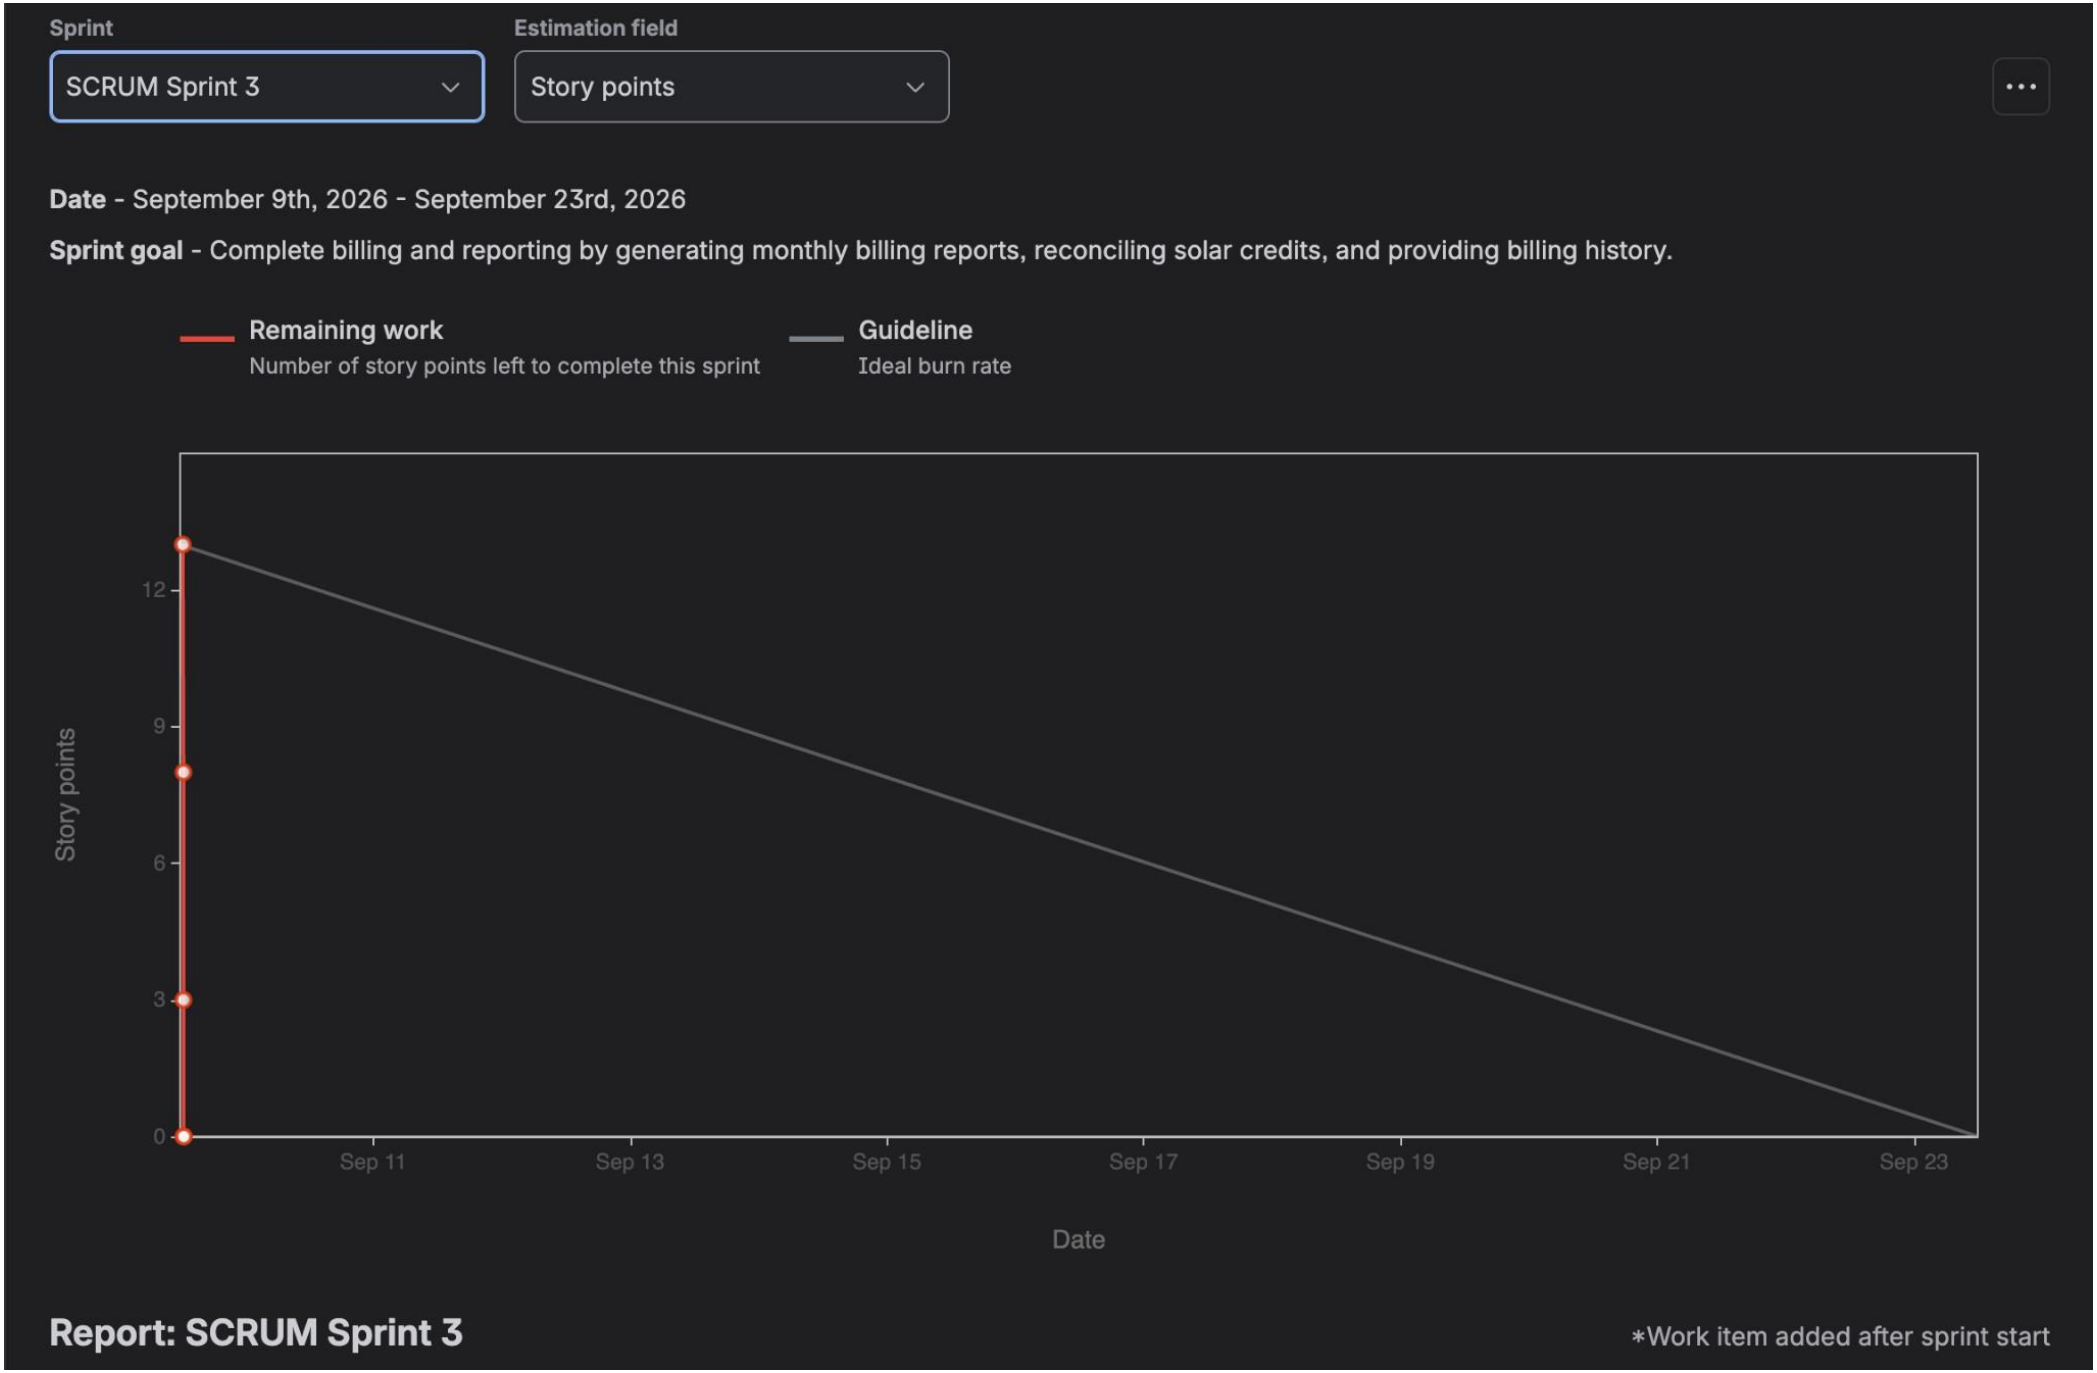

Jira Evidence – Burndown Chart: SCRUM Sprint 1

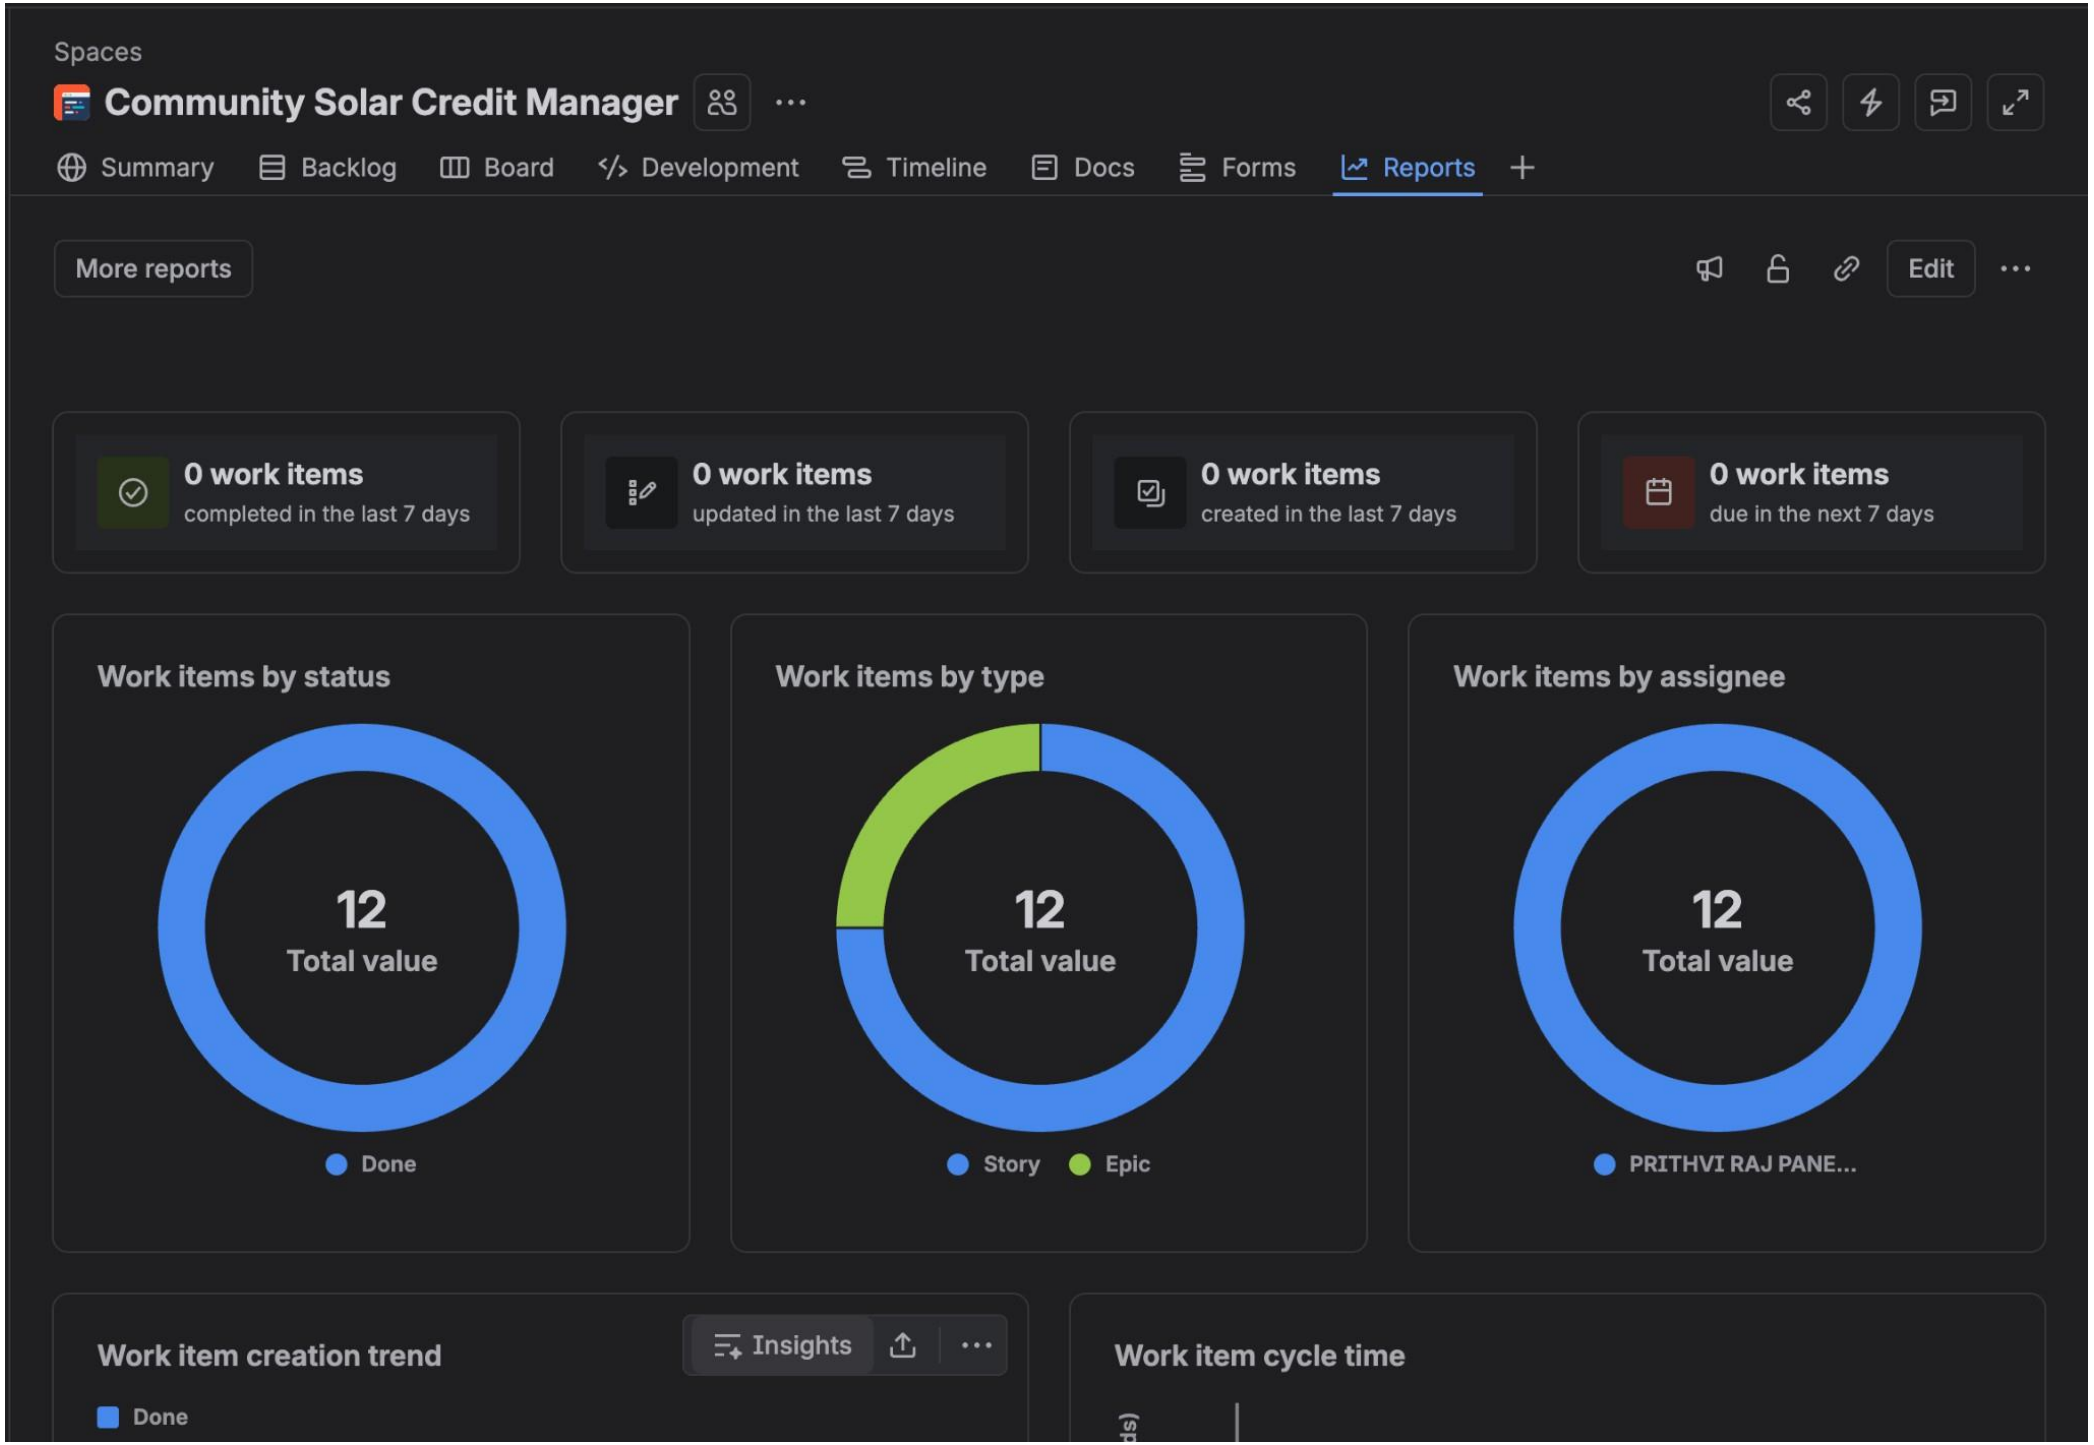

Jira Evidence – Burndown Chart: SCRUM Sprint 2

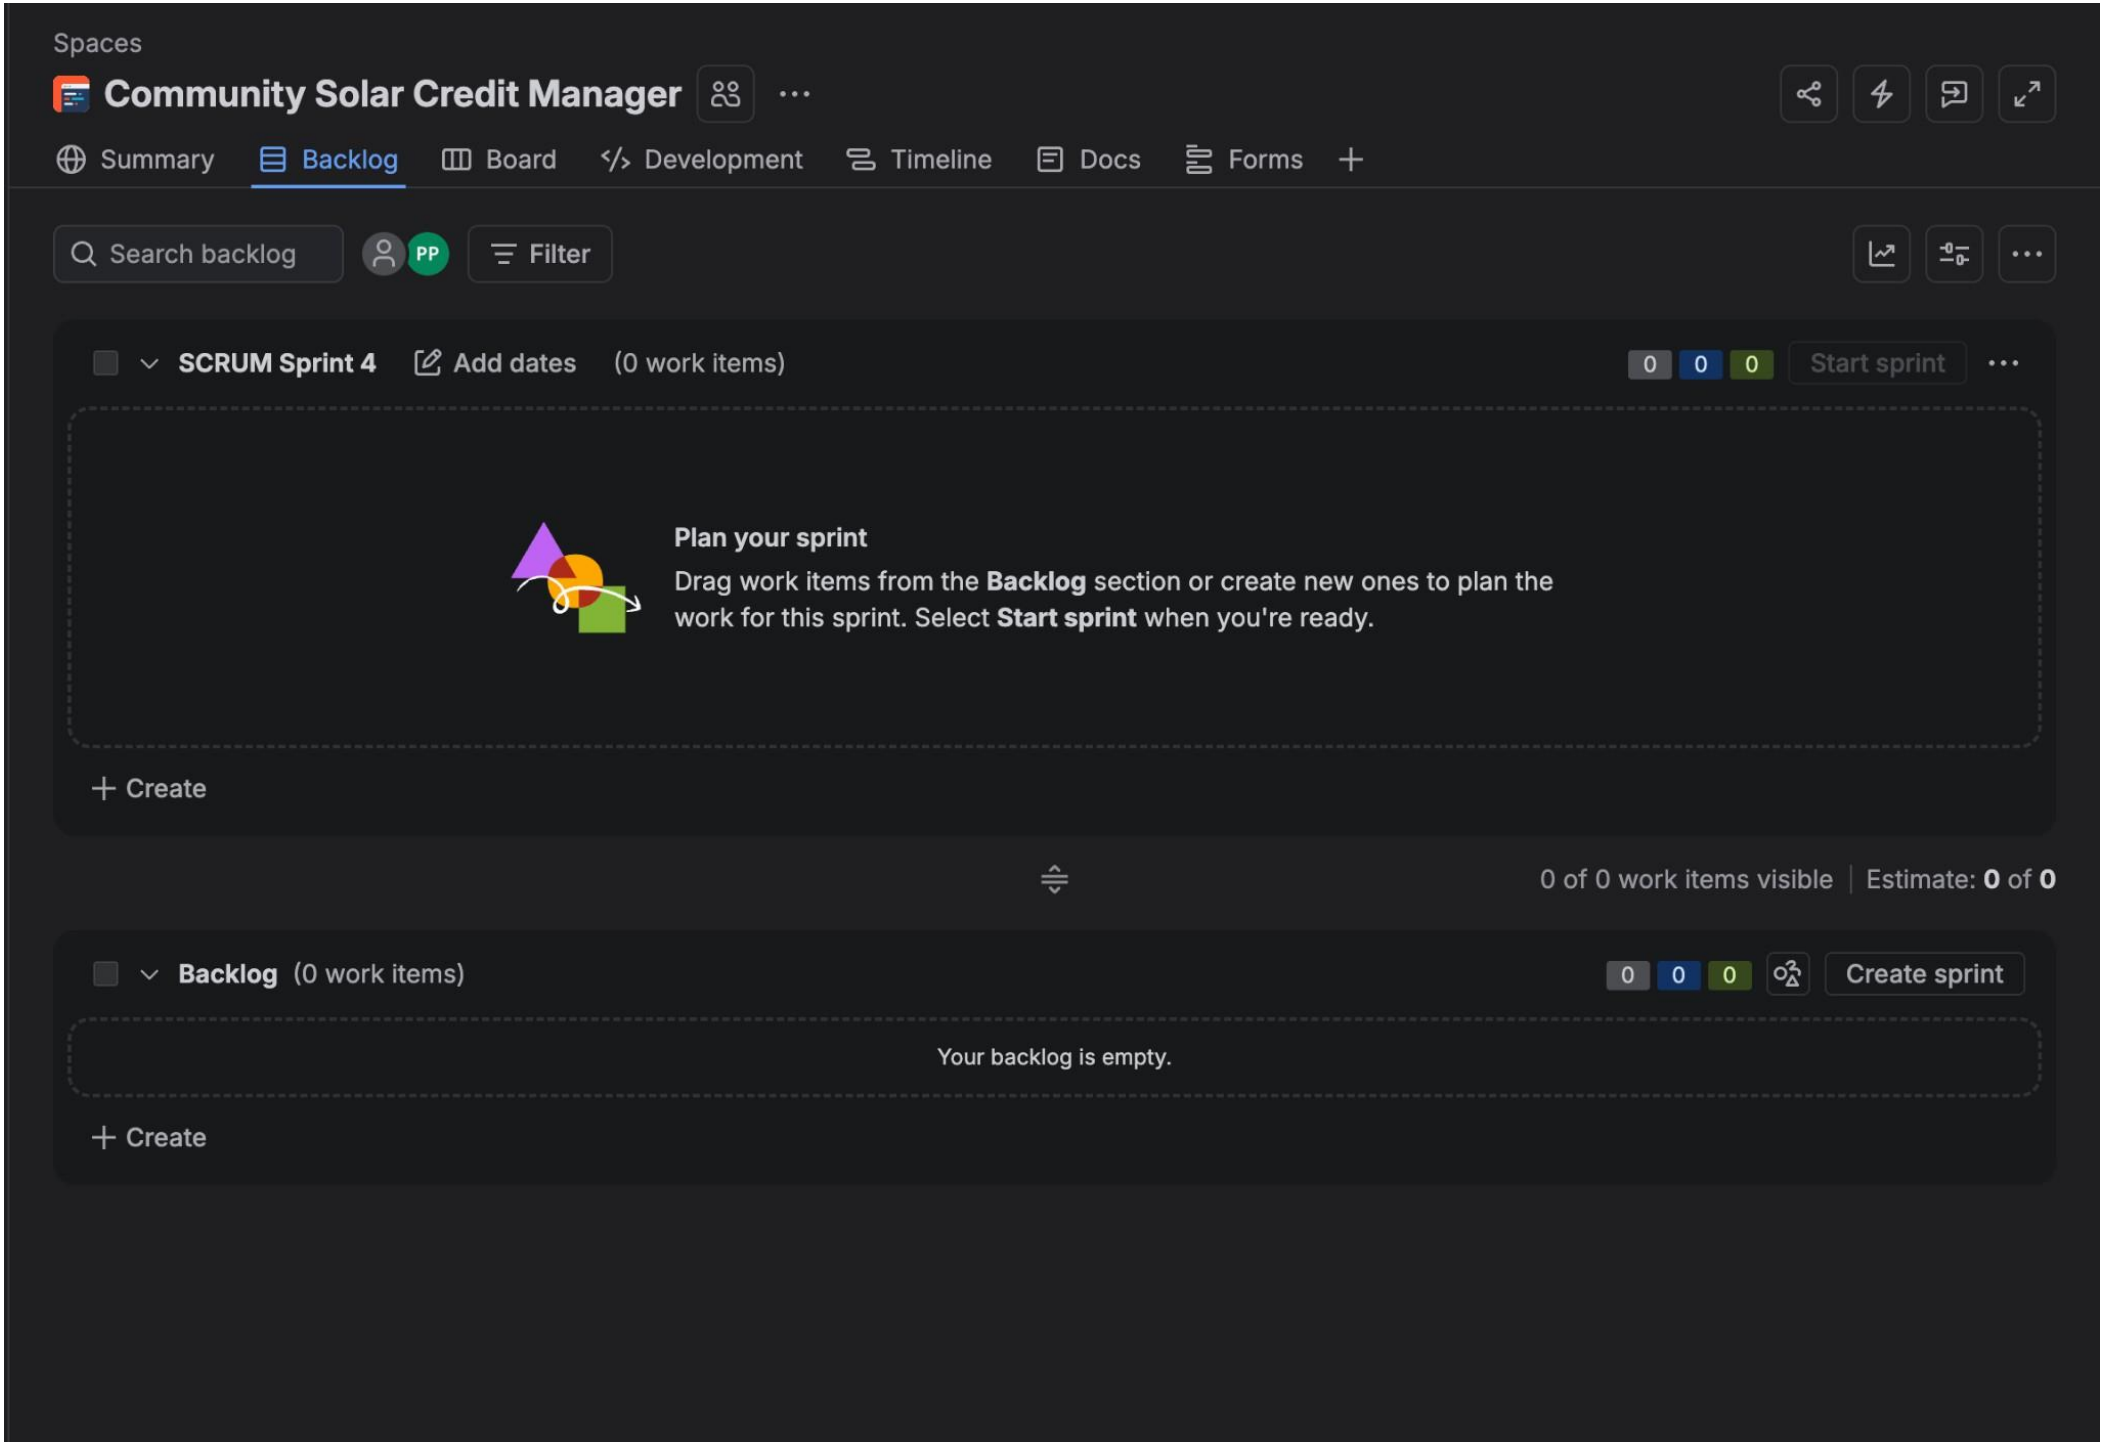

Jira Evidence – Burndown Chart: SCRUM Sprint 3

Jira Evidence – Jira Reports Dashboard: Overall Project Status

Jira Evidence – Final Backlog State: All Planned Work Completed

REFLECTION QUESTIONS & ANSWERS

1. Did your estimations reflect the actual effort?

Yes. The story point estimates reasonably reflected the relative effort and complexity of the work. Higher-point stories required more effort than the lower-point stories.

2. Was your backlog well-prioritized?

Yes. The backlog was prioritized based on importance and user impact. Higher-priority functionality such as credit validation and allocation was handled before less critical reporting activities.

3. How did your simulated sprint align with your plan?

The simulated sprints generally aligned with the planned work. The stories were divided into functional areas and progressed through To Do, In Progress, In Review and Done.

4. What insights did the burndown chart give about your team's capacity?

The burndown charts showed the amount of work remaining during each sprint and helped indicate the team's capacity to complete the planned workload. They also provided a visual comparison between actual remaining work and the ideal burn rate.

CONCLUSION

This lab helped me understand how Agile and Scrum are used in Jira. I created the backlog with epics, user stories, priorities, and story points and divided the work into three sprints.

I also learned how to track work from **To Do → In Progress → In Review → Done** and use burndown charts to check sprint progress. Overall, this lab gave me practical experience in **sprint planning, backlog management, estimation, and progress tracking using Jira**.
